

Uniteam Group Teams Up With Coneksion for Streamlined Carrier Connectivity

NEW YORK, NY, UNITED STATES,
January 14, 2026 /EINPresswire.com/ --

"We are pleased to announce our cooperation with Uniteam to deliver streamlined ocean carrier connectivity inside the Uniteam Group's TMS MagnaShip®, giving its customers immediate access to a vast network of pre-connected ocean carriers and enabling the full ocean messaging cycle - booking requests and confirmations, shipping Instructions, VGM and real-time track & trace" - to be executed directly from the TMS.

The foundation of the cooperation is a multi-carrier connectivity solution built on Coneksion's RAPIDS Carrier Connectivity Layer (CCL), which is already connected to major ocean

carriers. With this solution, MagnaShip® exchanges data with carriers via a single, secure API endpoint, removing the need for costly point-to-point integrations and allowing Uniteam Group to focus engineering effort on product experience and customer workflows. The solution is highly flexible and allows specific carriers to be added on request if they are not yet in [Coneksion's ecosystem](#). For Uniteam Group customers this means the ability to manage ocean freight end-to-end inside the TMS, with fewer manual handoffs, faster booking cycles, and improved shipment visibility.

Delivered as a white-glove service, Coneksion handles the heavy lifting of message and data harmonization, translating carrier formats and rules into the data model Uniteam Group requires. Carriers already in Coneksion's network become immediately available to Uniteam clients, and new carriers or additional message types can be introduced without changes to Uniteam Group's core platform.

The graphic features a dark blue background with a network of white nodes and lines. At the top left is the Coneksion logo (a stylized infinity symbol) and the text 'coneksion x'. To its right is the Uniteam Group logo (a 3x3 grid) and the text 'Uniteam Group' with the tagline 'Software Streamlining Your Logistics' below it. Below the logos is the text 'News & Press Releases'. The main headline is split into four teal boxes: 'Uniteam Group teams up', 'with Coneksion for', 'streamlined carrier', and 'connectivity'. Below this is a white line and the text 'Learn more >>'. At the bottom left is the URL 'www.coneksion.com'.

"We're delighted to team up with Coneksion. With carrier connectivity delivered as a managed service, MagnaShip® customers can execute the full ocean messaging cycle - from booking to shipping instructions, VGM and track & trace - directly in one workflow, without costly point-to-point integrations. That lets Uniteam keep engineering focus on product experience and customer outcomes," said Michael Sandberg, Partner & COO, Uniteam Group.

"Coneksion's RAPIDS CCL was built to remove integration bottlenecks for our customers, letting them focus on their business instead of doing integrations," said Geesche Laksola, CPO, Coneksion. "By streamlining carrier onboarding, we enable customers like Uniteam Group to scale fast, as customer integrations can take as little as one day, which lets Uniteam Group grow business quickly while their customers enjoy a seamless, enterprise-grade execution experience."

ABOUT UNITEAM GROUP

Uniteam Group is a logistics technology company developing MagnaShip®, a modular transport management platform designed for freight forwarders and logistics service providers. MagnaShip® brings operations, documentation, cost control and finance into one coherent workflow across multi-modal transport.

With configurable processes, shared templates and a strong integration layer, Uniteam Group helps customers standardise execution across countries and business units while retaining the flexibility needed for local carrier and partner requirements.
