Digitech Services Inc. Joins BiC-1 Joint Venture's OASIS+ Total Small Business Team to Deliver Advanced AI Capabilities

WASHINGTON, DC, UNITED STATES, January 14, 2026 /EINPresswire.com/ -- Digitech Services Inc., a Tier 2 BiC-1 Joint Venture (BiC-1 JV) partner, announced it has joined the BiC-1 OASIS+ Total Small Business team on an exclusive basis, bringing its deep expertise in artificial intelligence (AI), advanced analytics, and enterprise modernization to support federal agencies across priority OASIS+ domains.

Under this teaming arrangement, Digitech will provide its expert AI services and innovative AI-enabled tools in support of task orders aligned primarily to the Management & Advisory and Technical & Engineering domains, with additional applied capabilities supporting domain-adjacent requirements as mission needs evolve. Digitech's role focuses on helping agencies modernize operations, improve decision-making, and achieve measurable outcomes through responsible, compliant AI adoption.

"Partnering with BiC-1 JV on OASIS+ allows us to scale our AI expertise and enterprise solutions across federal missions while maintaining the rigor, compliance, and accountability agencies expect," said Dr. Saju Skaria, Founder & CEO of Digitech Services Inc. "Together, we offer a powerful combination of small-business agility, proven delivery, and forward-operating AI capability."

Chris Stahl, CEO of Stahl Companies added, "This partnership puts Digitech's AI to work in real federal programs—driving modernization and better decisions without unnecessary risk."

Digitech contributes a proven portfolio of AI-native, enterprise solutions and applied AI services, including workforce orchestration, data governance, business model transformation, scenario modeling, infrastructure optimization, and regulated-environment analytics. These capabilities are designed to integrate seamlessly into professional services delivery, enabling faster execution, improved governance, and reduced risk.

BiC-1 JV and Digitech are positioned to support OASIS+ task orders requiring advisory-led transformation, secure software engineering, data and analytics, applied AI, and enterprise modernization, providing agencies with flexible, compliant, and mission-ready solutions.
