

# Virtual Vocations Releases 2025 Remote Work Statistics Report Detailing Remote Job Posting Activity

*424,778 fully remote jobs posted in 2025 highlight continued growth and long-term stability in the remote labor market*

TUCSON, AZ, UNITED STATES, January 26, 2026 /EINPresswire.com/ -- [Virtual Vocations](https://www.einpresswire.com/news/2026/01/26/virtual-vocations-releases-2025-remote-work-statistics-report) has released its [2025 Remote Work Statistics Report](https://www.einpresswire.com/news/2026/01/26/virtual-vocations-releases-2025-remote-work-statistics-report), presenting a data-focused analysis of remote job posting activity reviewed within its database between 2023 and 2025.

The report documents 424,778 remote job postings reviewed and published by Virtual Vocations during 2025, representing the largest annual volume recorded within the organization’s database to date. Findings highlight posting distribution by quarter, job category, job type, and experience level for fully remote roles.

## Key Statistical Highlights from 2025

424,778 remote jobs were reviewed and published in the Virtual Vocations database during 2025.

Posting activity was distributed throughout the year, with the highest quarterly volume occurring in Q2 2025.

The most frequently posted remote job categories included Information Technology, Customer Service, and Human Resources.

2025 Top Remote Job Industries

Remote Jobs in 2025

Full-time and permanent roles represented the majority of remote postings reviewed.

Employers most often sought experienced professionals, while maintaining meaningful volumes of entry-level, senior-level, and executive opportunities.

### Context for Year-Over-Year Comparisons

The report emphasizes that increases in posting volume observed in late 2024 and early 2025 reflect expanded visibility into qualifying remote roles, rather than a direct assertion of overall growth in employer remote hiring.

Beginning July 1, 2024, Virtual Vocations updated its job inclusion criteria to include remote roles that have state restriction for locations, which expanded the range of remote positions eligible for review and publication.

In addition, AI-assisted job identification tools were introduced in March 2025 to improve the efficiency of identifying potential remote job postings for review. In addition to initial company vetting and job review by experienced staff, Virtual Vocations conducts daily human audits across its job database to verify continued compliance with remote criteria and internal quality standards. This layered approach ensures that posted opportunities remain legitimate, accurate, and aligned with the organization's definition of remote work.

### Focus on Measurement, Not Market Forecasting

The 2025 Remote Work Statistics Report documents trends observed within Virtual Vocations' reviewed job database and does not attempt to quantify total remote hiring across the broader labor market.

By maintaining consistent review standards and transparently documenting methodological updates, the report provides a reference point for researchers, educators, policymakers, and jobseekers seeking to understand how fully remote job postings are distributed across industries and experience levels.

### About the Report

The 2025 Remote Work Statistics Report analyzes remote job postings reviewed by Virtual Vocations between January and December 2025, with [comparative data from 2023 and 2024](#).

### About Virtual Vocations

Virtual Vocations is a remote job board and research organization focused on identifying, reviewing, and vetting legitimate fully remote employment opportunities. Since 2007, Virtual

Vocations has provided curated job listings and data-driven insights to support jobseekers navigating remote work.
