BPX is a leading provider of Business Process Management solutions, helping organizations optimize their workflows and improve efficiency. BPX's solutions are designed to be easy to use and integrate with existing systems, making it a popular choice for businesses of all sizes.

WalkMe's powerful software usage analytics platform gives you a clear picture of how users

behave, how well they follow processes, and how they engage with each other in digital ecosystems. BPX uses these insights to design strategies that get rid of bottlenecks, make it easier to go about, and make sure that key jobs are done promptly and correctly. This makes things run more smoothly, increases worker productivity, and gets more out of software investments.

Nikhil Agarwal, the creator of BPX, said, "Companies often don't know how useful analytics can be for streamlining their processes." We're using WalkMe's process analytics and our consulting skills to help firms discover hidden problems and take action based on what they learn. The partnership gives clients the tools they need to use data to make decisions that make their businesses more profitable and their procedures more adaptable.

BPX is a digital process expert that helps businesses optimize their digital processes and improve their digital transformation efforts.

BPX's use of WalkMe's process analytics is part of a larger plan to help businesses with their digital transformation efforts. With actionable data from process analytics WalkMe, organizations can find features that aren't being used enough, keep track of how engaged users are, and create smart workflows that match the needs of their operations.

"By using WalkMe's workflow intelligence, we help our clients with workflow optimization and make their software easier to use," stated Rupal Agarwal, co-founder of BPX. "Our goal is to change how businesses think about process improvement by bringing together visibility, automation, and analytics into one plan."
