

# ALIVE Podcast Network Enters Its Next Era with New Original Show, Distribution Expansion, and a Landmark Anniversary

*ALIVE Podcast Network expands to Samsung TV, launches new programming, and signals its next chapter ahead of its four-year anniversary.*

WASHINGTON, DC, UNITED STATES, January 15, 2026 /EINPresswire.com/ -- The [ALIVE Podcast Network](#) is stepping boldly into its next chapter.

As the Black-owned media and technology platform approaches its four-year anniversary on February 22, the network announced a powerful slate of new original programming—while also revealing a major distribution milestone: ALIVE Podcast Network is now available on Samsung TV, significantly expanding its connected television footprint.

“

... what's the point of building legacy if you're burned out, disconnected, or silently struggling?"

*Angel Livas*

This expansion builds upon ALIVE's existing presence on Apple TV, Fire TV, and Roku, positioning the network to reach millions of new households globally—bringing culturally resonant, creator-led storytelling directly into living rooms worldwide.

As the platform expands its programming and reach, its mission remains unchanged: to amplify Black voices, honor lived experience, and create space for stories that move culture forward.

"ALIVE was never about just creating content—it was about building an ecosystem," said Angel Livas, Founder of ALIVE Podcast Network.

The upcoming anniversary marks a defining evolution for ALIVE Podcast Network, as it introduces shows that challenge norms, center wellness, celebrate Black excellence, and speak

honestly to the lived experiences of its audience. From boundary-pushing conversations on self-love and liberation, to faith-forward dialogue and culture-shifting wellness storytelling, the network's newest programming reflects where the culture is—and where it's headed.
