

Vollrath Introduces New Induction Products Powered by Energy-Efficient Technology

Vollrath's new induction cooking and warming solutions are engineered for power, precision, and energy efficiency.

SHEBOYGAN, WI, UNITED STATES,
January 19, 2026 /EINPresswire.com/ --

The Vollrath Company, a leading manufacturer of foodservice equipment and solutions, introduces new equipment powered by its latest induction technology, along with new 4-quart rethermalizers and warmers.

Available now, these new products meet the needs of a growing market that requires efficiency, safety and innovation.

Vollrath's new induction solutions are designed to complement every kitchen.

Engineered to empower, Vollrath's patented induction circuitry features an expanded magnetic field with instantaneous pan detection that emulates gas cooking, allowing users to lift and tilt pans without heat interruption. Powered by InductIQ™, Vollrath's latest induction technology, they deliver precise temperature control, quick power, and flameless Energy Star efficiency that is safer, cooler, and 93% more efficient than cooking with gas.

"Designing and engineering durable, high-quality products is central to our commitment to our customers," said Vollrath Product Manager Becky Guentner. "Through continuous innovation in induction cooking and warming technology, we're helping customers improve energy efficiency and reduce operational costs."

Vollrath's new induction solutions are designed to complement every kitchen:

- Heavy-duty induction ranges take high-performance technology to the back of the house, available in two or four hobs with 2900 watts of power per hob.
- Dual countertop ranges offer versatile two-hob configurations, with each hob providing 2900 or 3500 watts.
- Drop-in induction ranges include new single- and dual-hob designs that deliver 2900 or 3500 watts of energy-efficient power per hob.

- Compact 4-quart countertop and drop-in induction rethermalizers take prepared foods from chilled to hot, and a new drop-in induction warmer keeps hot food hot.

Perfect for convenience stores, the new 4-quart induction rethermalizers and warmers join Vollrath's popular 7- and 11-quart lineup. They heat without the need for water, quickly bringing food to safe serving temperatures to maximize quality and minimize waste. In addition to soups and other dishes, they're ideal for warming chocolate and sauces.
