

Argent LNG and Tecnimont Sign Strategic Term Sheet to Align Project Execution

Strategic framework supports modular LNG development at Port Fourchon, emphasizing execution certainty, scalability, and bankable technologies.

METAIRIE, LA, UNITED STATES, January 21, 2026 /EINPresswire.com/ -- [Argent LNG](#), LLC and [Tecnimont](#) S.p.A., the engineering and construction arm of MAIRE Group, today announced the execution of a term sheet establishing a strategic framework for Tecnimont's participation and long-term execution alignment in the Argent LNG export project.

The term sheet reflects a shared intent to align engineering execution and development discipline as the project advances through front-end engineering and design (FEED),

regulatory permitting with the U.S. Federal Energy Regulatory Commission (FERC), and toward final investment decision (FID). The framework is intended to strengthen project governance, enhance technical rigor, and support a capital-efficient development pathway aligned with the expectations of regulators, lenders, and global LNG customers.

Argent LNG is developing a modular LNG export facility at Port Fourchon, Louisiana—one of the United States' most strategically located and hurricane-resilient energy hubs, with direct access to deepwater and established Gulf Coast infrastructure. The project is structured around a modular development philosophy designed to reduce upfront capital requirements, compress construction schedules, and enable phased scalability, positioning the platform as a replicable model for future LNG developments.

The Argent LNG platform has been engineered around modular solutions from globally

recognized technology leaders, including Baker Hughes, Honeywell UOP,ABB, and GTT. Early-stage integration of liquefaction, pretreatment, power,automation, and LNG containment systems is intended to enhance execution certainty,reduce interface risk, and support a disciplined and bankable pathway to FID.

Under the framework established by the term sheet, Argent LNG and Tecnimont intend to further integrate engineering definition, constructability analysis,and execution planning at an early stage of development. Tecnimont's proposed participation reflects confidence in Argent LNG's modular design strategy,regulatory approach, and execution framework, as well as the project'sstrategic location and long-term relevance to global energy markets.

Argent LNG

“This term sheet represents a meaningful alignment between capital,engineering, and execution,” said Jonathan Bass, Chairman of Argent LNG.“Engaging a Tier-1 global engineering organization at this stage underscores the seriousness, discipline, and long-term vision behind the Argent LNG platform. Our objective is to deliver a project that meets the highest standards of technical excellence, regulatory credibility, and capital efficiency.”

“

This Term sheet establishes a framework for integrated engineering execution and long-term alignment as Argent LNG's modular LNG project advances toward FEED and FERC milestones”

Jonathan Bass, Chairman & CEO

“Our collaboration with Argent LNG is grounded in a shared focus on execution quality, technical rigor, and disciplined project development,” said Alessandro Bernini, Chief Executive Officer of MAIRE. “The term sheet establishes a framework to further align our interests as

the project progresses through its next phases.”

The agreement represents one step within a broader, phased collaboration strategy designed to advance the project through clearly sequenced engineering, regulatory, and commercial milestones.

About Tecnimont

Tecnimont S.p.A. is the engineering and construction arm of MAIRE Group and aglobally recognized leader in the execution of complex energy infrastructureprojects. With decades of experience delivering large-scale, technicallyadvanced facilities worldwide, Tecnimont provides integrated engineering,procurement, and construction services across the full project lifecycle.

The company is known for its strong engineering capabilities, rigorousexecution discipline, and focus on safety, quality, and sustainability.Tecnimont has a long track record in cryogenic, gas processing, and industrialinfrastructure projects, supporting clients with solutions designed to meetstringent regulatory, environmental, and operational requirements acrossdiverse geographies.

About Argent LNG

Argent LNG, LLC is a U.S.-based energy infrastructure developer focused ondelivering next-generation, modular LNG export solutions designed to enhanceenergy security, capital efficiency, and execution certainty.

Headquartered inLouisiana, Argent LNG is developing a proposed modular LNG export facility atPort Fourchon, a strategically located and hurricane-resilient energy hub withdirect access to deepwater and established Gulf Coast infrastructure.

Argent LNG's development strategy emphasizes proven, bankable technologies,disciplined engineering, and modular execution to reduce project risk, improveschedule predictability, and support scalable deployment. The company iscommitted to advancing U.S. energy leadership
