

Kizling Introduces Interactive Digital Literacy Platform for Kids at CES 2026, Mixing Safe SNS with AI Content Creation

LAS VEGAS, NV, UNITED STATES, January 23, 2026 /EINPresswire.com/ -- [Kizling](#) (CEO [Hyelim Lee](#)), an AI-based digital short-form challenge platform designed for children, unveiled its interactive digital literacy platform at CES 2026, presenting a vision that combines safe social networking with AI-driven content creation for the Alpha Generation.

Kizling was [selected as a recipient of the CES Innovation Awards](#) in the Mobile Devices, Accessories & Apps category ahead of the exhibition. The award recognized the platform's innovation in enabling children to create and share content, participate in global challenges, and interact with peers within a carefully protected digital environment.

The company made its first official appearance at CES 2026 Unveiled on January 4 (local time), a preview event introducing Innovation Award winners and emerging technology leaders to global media. Through this early showcase, Kizling gained international exposure for its children-only participatory content platform.

Hyelim Lee, CEO of Kizling, gives an interview to AVING News reporter Jay Kennedy Markus.

Founded in 2022, Kizling develops digital platforms for children and teenagers with a strong

emphasis on education, safety, and social responsibility. Its service is structured as a short-form challenge platform dedicated to the Alpha Generation, encouraging users to move beyond passive viewing and become active creators. By participating in creative challenges, children naturally develop digital literacy, self-expression, collaboration skills, and responsible online communication.

Kizling's platform integrates AI-based recommendation algorithms with advanced content-safety filtering to ensure that content is age-appropriate and aligned with individual interests. The company explained that this structure allows children to explore creativity and peer interaction, while parents, educators, and institutions can trust the environment's safety and educational value.

During CES 2026, Kizling also participated in interviews and demonstrations at the Media Stage inside the Seoul Pavilion at Eureka Park from January 6 to 9. The company drew strong attention from global visitors by showcasing its child-friendly interface, intuitive user experience, and AI-driven content curation optimized specifically for young users.

In addition to its consumer-facing service, Kizling introduced a SaaS solution for schools and institutions. This solution enables educators to host online challenges and competitions, monitor student participation, and provide structured feedback, signaling the company's expansion into B2B and B2G markets and deeper collaboration with educational organizations.

Kizling has continued to build global recognition beyond CES. The company was selected for HolonIQ's "East Asia EdTech 150" and placed third in the Korean finals of the Global EdTech Startup Awards, underscoring the maturity and scalability of its platform. Building on this momentum, Kizling is accelerating discussions with partners to expand into North America and
