

Tiponline POS Launches Free Forever POS System for Halal Restaurants

Tiponline POS removes monthly fees for Halal restaurants with a full-feature POS, online ordering, AI tools, and payments — built to support growing businesses.

OTTAWA, ON, CANADA, February 3, 2026 /EINPresswire.com/ -- Tiponline POS today announced the launch of its Free Forever POS system for Halal restaurants, now available across Canada and the United States. The platform is designed to help restaurant owners significantly reduce operating expenses while accessing modern, enterprise-level restaurant technology — without monthly fees or long-term contracts.

As Halal restaurants face rising costs related to software subscriptions, third-party delivery platforms, and staffing shortages, Tiponline POS offers a practical alternative: a fully integrated POS system that removes recurring software expenses while improving operational efficiency.

Designed to Reduce Costs, Not Add Them

Tiponline POS eliminates the most common technology expenses faced by restaurants by offering a comprehensive set of tools at no monthly cost, including:

AI Order Assistant to support order taking and reduce staff workload

Online ordering website for takeout, delivery, and reservations — fully branded for the restaurant

Digital menu management to eliminate printing and update costs

Kitchen Display System (KDS) to improve order accuracy and kitchen efficiency

Point of Sale (POS) for dine-in, takeout, and delivery operations

There are no monthly fees, no software subscriptions, and no contracts, allowing restaurants to scale and operate without long-term financial commitments.

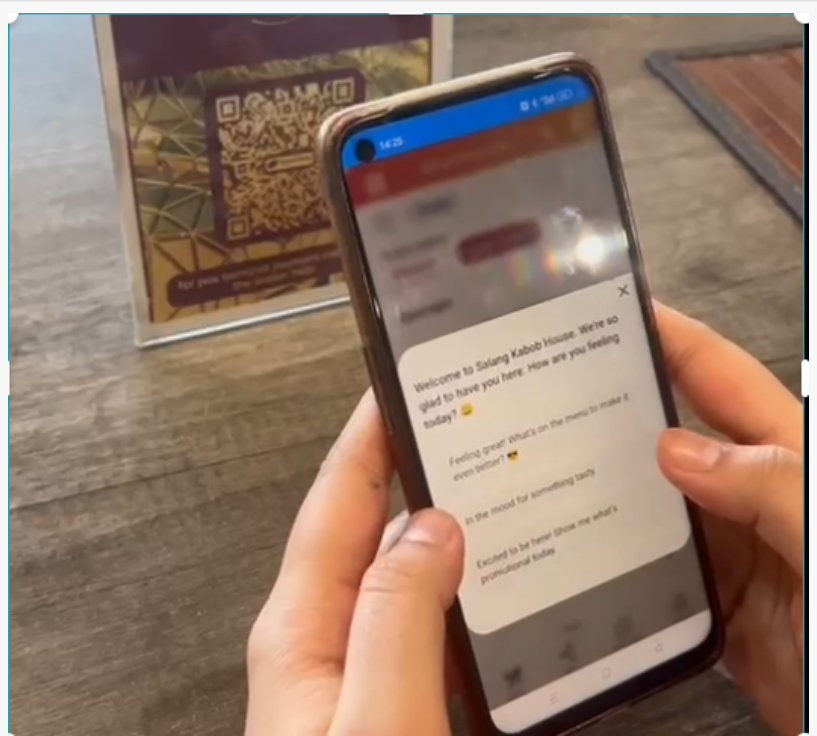

Why Tiponline POS Is Free

Traditional POS systems rely on recurring subscription fees that increase a restaurant's fixed costs. Tiponline POS follows a different approach.

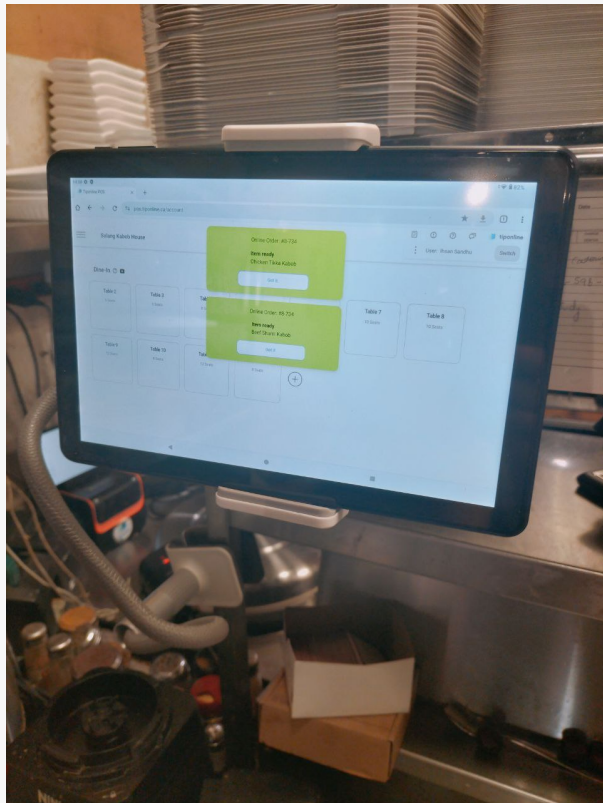

The POS software itself is completely free for restaurants. Instead of charging business owners, Tiponline generates revenue through a small service fee paid by customers when placing online orders. This model allows restaurants to retain control over their margins while avoiding the high commissions charged by third-party marketplaces.

By shifting costs away from the restaurant, Tiponline POS helps Halal businesses protect profitability and reinvest savings into staff, food quality, and growth.

Built for Halal Restaurants in North America

Tiponline POS Chatbot

Tiponline KDS

Tiponline POS is designed with the operational realities of Halal restaurants in mind, supporting diverse menus, multilingual communities, and both quick-service and full-service workflows.

The platform enables restaurants to:

Reduce recurring technology expenses

Increase direct online orders

Improve order accuracy and service speed

Simplify daily operations through a single system

Tiponline POS supports restaurants at every stage — from newly opened locations to multi-location operators — without locking them into contracts or costly upgrades.

Availability

Tiponline POS is now available to Halal restaurants throughout Canada and the United States.

As a [Halal POS system](#), Tiponline POS is designed to meet the operational and financial needs of Halal restaurants while removing unnecessary costs. By offering [free POS software](#), Tiponline POS helps restaurant owners reduce fixed expenses and focus on growing their business instead of paying monthly technology fees.
