

Poland's Leading Prop Trading Review Platform Begins Alignment with VeritasChain Protocol

Launches a VCP educational profile and pilots "Verifiability Readiness" criteria to promote publicly verifiable transparency signals

WARSAW, POLAND, January 27, 2026

[/EINPresswire.com/](#) -- [VeritasChain Standards Organization \(VSO\)](#), a vendor-neutral non-profit developing cryptographic audit trail standards for algorithmic trading, today announced a collaboration with [propfirm.pl](#), an analytical platform serving the

proprietary trading community in Poland. Through this collaboration, propfirm.pl is beginning alignment with VeritasChain Protocol (VCP) concepts by incorporating cryptographic-verifiability criteria into selected parts of its transparency and methodology disclosures, and by publishing educational material to help traders understand independent verification of transaction logs.

“

Traders need verifiable signals. VeritasChain's approach — cryptographic proof over narrative — aligns perfectly with propfirm.pl's mission.”

*Tomasz Kowalski, Founder,
propfirm.pl*

basis for account actions.

“The 2024 crisis showed that narrative is not enough. Traders need verifiable signals. VeritasChain's approach — cryptographic proof over narrative — aligns with our goal of improving transparency. We're starting by educating the market and piloting verifiability criteria

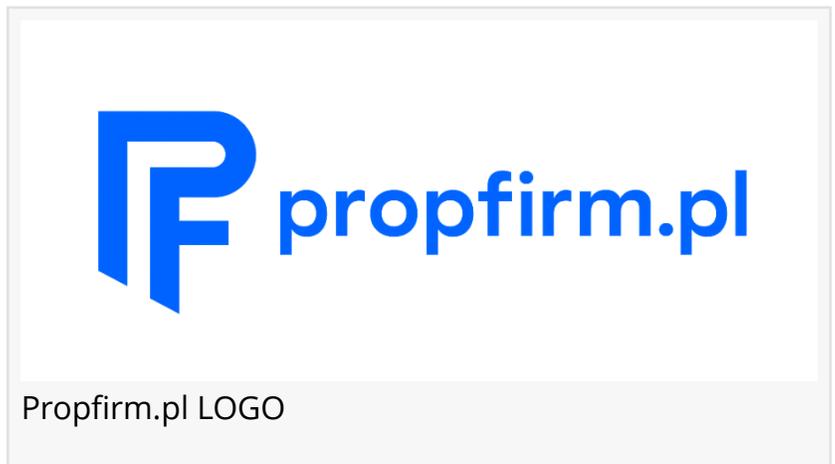

VeritasChain
Open, Regulator-Ready Audit Standard for AI & Algo Trading

that can be checked publicly.”
— Tomasz Kowalski, Founder,
propfirm.pl

□ Collaboration Highlights

Education & Technology Initiative:
propfirm.pl has launched a dedicated
Technology section featuring a
VeritasChain Protocol (VCP) profile and
educational content explaining
verifiable audit trails and independent verification of transaction records.

“Verifiability Readiness” Pilot: propfirm.pl is piloting an additional evaluation dimension that focuses on publicly verifiable transparency signals such as changelog disclosure practices and evidence-handling policies. VSO provides technical terminology and reference guidance for what constitutes verifiable signals, while propfirm.pl retains full independence over its editorial decisions and any ranking outcomes.

Knowledge Transfer: The collaboration enables access to global regulatory and standards perspectives on auditability and verifiable recordkeeping for algorithmic trading systems.

“Our goal is to make verification practical. We welcome initiatives that help traders understand what can be independently verified, and what cannot. propfirm.pl is exploring a transparency-oriented approach, and we’re contributing standard definitions and technical context — not platform endorsements.”

— Tokachi Kamimura, Founder & Technical Director, VSO

□ About VeritasChain Standards Organization (VSO)

VSO is a vendor-neutral, non-profit standards body developing the VeritasChain Protocol (VCP) — a cryptographic audit trail standard for AI-driven and algorithmic trading systems. Operating under the principle Verify, Don’t Trust, VSO promotes mathematical verifiability as the foundation for market integrity and has shared VCP materials with regulatory authorities across multiple jurisdictions. VSO does not endorse any broker, prop firm, or trading platform, and does not participate in commercial rankings or investment recommendations.
