The US Navy Veterans Mesothelioma & Lung Cancer Advocate says, "We are advocates for navy veterans who have developed mesothelioma or asbestos exposure lung cancer nationwide and we want people like this to receive the best possible compensation results. Most navy veterans who have developed these types of cancers were typically exposed to asbestos on a navy ship, submarine or at a navy shipyard. The navy sailors would have been exposed to asbestos working on the engine room-propulsion center, working as a member of a maintenance crew, in a repair shop on the ship or submarine, or assisting shipyard workers at a shipyard as we are always happy to discuss at 866-714-6466.

"What sets us apart from other groups on the internet that are trying to get the attention of navy veterans who now have mesothelioma or asbestos exposure lung cancer is we are advocates. As advocates we want to make certain a navy veteran with mesothelioma or asbestos exposure lung cancer receives the best compensation results. At no charge to a navy veteran with one of these cancers please call us at 866-714-6466 for suggestions about what lawyer to call-and we are always give at least three choices.
