

# BLK HX fuels urgent dialogue on collective economics as a new community wealth framework gains multicultural attention

*As Black History Month begins, a West Philadelphia wealth model is sparking global dialogue on collective economics and shared prosperity.*

PHILADELPHI, PA, UNITED STATES, January 30, 2026 /EINPresswire.com/ -- As Black History Month renews global conversations on economic equity and generational legacy, The [West Philadelphia Billionaire Society](#) (WPBS):

A Blueprint for Community-Owned Wealth and Prosperity is igniting multicultural dialogue on collective economic power. Authored by educator and veteran Aaron M. Montague, the framework is gaining attention from educators, civic leaders, faith institutions, and international community organizers exploring scalable models for cooperative economics and community-owned wealth development.

BLK HX Imagines

“

The economic philosophy of Black nationalism is pure and simple. It means we should own and operate and control the economy of our community.”

*Malcolm X*

Interest in the framework has expanded internationally, with educators, entrepreneurs, and community organizers exploring how the model could be adapted for local contexts. This growing global engagement highlights the universal relevance of collective economic systems while raising critical questions about leadership, stewardship, and community agency.

“There are moments in history when a people must decide whether they will be observers of progress or architects of

it,” Montague said. “Black History Month reminds us that legacy is not only remembered—it is built.”

Scholars and community leaders suggest that WPBS could serve as a curriculum resource for

financial literacy, leadership development, and community governance education. Faith institutions, universities, nonprofits, and civic organizations are examining the framework as a tool for structured dialogue on economic equity and cooperative investment strategies. Montague emphasized that frameworks alone do not transform communities; participation does. "The blueprint invites disciplined action, structured education, and coordinated effort. When communities align vision with behavior, the future becomes measurable."

As Black History Month continues to highlight both historical struggle and forward-looking solutions, The West Philadelphia Billionaire Society is prompting renewed discussion about economic sovereignty, collective responsibility, and generational legacy. Observers across sectors are increasingly considering how cooperative wealth-building models could influence future policy, philanthropy, and community development initiatives.
