The photo booth rental industry increasingly uses software-hardware separation models, in which operators may select hardware from multiple manufacturers and use third-party software platforms to control devices and manage event workflows. The company stated that ChackTok supports control workflows for 12 photo booth hardware brands via wireless protocols and is available on iOS and Android.

## Overview

According to the company, the platform is used for:

- Creating and managing event sessions
- Capturing photos and videos through multiple shooting modes
- Applying effects and producing outputs for sharing
- Operating device control workflows for supported booth and camera configurations

Product capabilities reported by the company

The company listed the following functions:

Event creation and management

- Event setup using templates for different event formats

- Photo and video organization by event session

#### Hardware and camera control

- Motor control for 360 photo booth rotation (speed, direction, timing, emergency stop)
- Support for multiple booth types, including 360 photo booths, iPad booths, and mirror booths
- Camera integration with GoPro 9-13
- DSLR camera support (Canon and Nikon)
- Display mirroring for TV and projector setups

#### Image processing and capture modes

- AI background removal and replacement
- Slow-motion processing and frame interpolation
- Video effects and photo filters
- Capture modes including video, rotating video, GIF, Boomerang, and burst photos

#### Customization and on-site output options

- Branding options including overlays, watermarks, and logos
- On-site printing integration, according to the company

#### Event distribution and data capture

- Content sharing via QR code, SMS, and email
- Social media sharing, according to the company
- Email capture and engagement tracking, according to the company

#### Offline operation

- Offline operation with local storage and later synchronization, according to the company

#### Reported use cases

The company cited use across four segments:

- Wedding and event rentals
- Corporate brand activations
- Private celebrations
- Large-scale public events

#### Platform metrics reported for Q1 2026

LINKSIGN UK CO., LTD reported the following metrics:

- 300,000+ registered users across 200+ countries
