

# Blink AI and EvenFlow AI Partner to Transform Auto Dealership Fixed Ops Scheduling and Throughput

*AI-powered partnership connects customer demand with real-time shop capacity to drive higher service revenue and improve customer experience*

LAS VEGAS, NV, UNITED STATES, February 3, 2026 /EINPresswire.com/ -- Blink AI Automotive, the

“

Together, we close the loop between intent and execution — which is where real Fixed Ops performance is won or lost.”

*Dave Perry, CEO of Blink AI*

leading AI-powered customer engagement and demand orchestration platform for automotive dealerships, today announced a strategic partnership with EvenFlow AI, the industry leader in dealer capacity management, shop loading, and profit optimization.

Announced ahead of NADA 2026, the partnership delivers a tightly integrated solution that connects customer intent and inbound demand with real-time technician availability

and operational constraints by service mix, enabling dealers to more intelligently schedule appointments that maximize Fixed Ops revenue without hiring more technicians.

For the first time, dealers can orchestrate the entire service journey end to end: from inbound calls, digital scheduling, and telematics-driven alerts handled by Blink AI, through to optimized appointment placement and shop utilization powered by EvenFlow AI's advanced capacity intelligence.

“Dealers don't have a demand problem — they have a coordination problem,” said Dave Perry, CEO of Blink AI. “Blink AI captures and activates customer demand. EvenFlow AI understands what the shop can actually handle. Together, we close the loop between intent and execution — which is where real Fixed Ops performance is won or lost.”

## Solving One of Fixed Ops' Most Expensive Gaps

Dealerships today face record inbound demand—calls, digital requests, OEM alerts—while service departments struggle with overloaded advisors, uneven shop utilization, and missed revenue opportunities. Traditional schedulers operate in isolation, unaware of real shop constraints, leading to overbooking, underutilization, and poor customer experiences.

The Blink AI + EvenFlow AI partnership directly addresses this gap by:

- Aligning appointment scheduling with true shop capacity
- Balancing the flow of customer demand with technician workloads
- Reducing bottlenecks, “spoiled” technician hours, and appointment fallout
- Increasing repair order throughput while better delivering on customer promise times

“We enable dealers to schedule appointments at the right time with the right resource to drive Fixed Ops profitability”, said Dave Anderson, CEO of EvenFlow AI. “By integrating with Blink AI, dealers can act on demand intelligently and end the days of ‘controlled chaos’ in the service drive.

See It Live at NADA 2026

Blink AI and EvenFlow AI will showcase the joint solution during NADA 2026 in Las Vegas, offering live demos and executive briefings for dealer principals, Fixed Ops leaders, and dealer groups seeking measurable operational gains.

Visit Blink AI at Booth #6453N to see how AI-driven demand orchestration and capacity optimization finally come together.

About Blink AI Automotive

Blink AI Automotive is an AI-powered customer engagement and demand orchestration platform built for automotive dealership Fixed Operations. Blink AI captures inbound calls, digital requests, and OEM telematics alerts and turns them into coordinated actions that book appointments, improve service throughput, and drive measurable Fixed Ops revenue—without adding headcount. Serving dealer groups and OEM partners across North America, Blink AI helps dealers turn customer intent into real outcomes. For more information, visit [www.blinkai.com](http://www.blinkai.com)

About EvenFlow AI

EvenFlow AI is a leading provider of AI-powered capacity management and revenue optimization solutions designed for automotive dealership service departments. The company's innovative platform leverages data-driven algorithms to optimize service scheduling, increase lane utilization, and enhance customer satisfaction, all of which contribute to maximizing profitability for dealership partners.
