

# Capsuler Launches a New Platform To Securely Store and Share Future Memories

*Securely store and schedule authentic video messages for the future. A real, non-AI way for families and soldiers to preserve their legacy today.*

TEL AVIV, CENTER, ISRAEL, February 4, 2026 /EINPresswire.com/ -- Real Emotions, No AI: Capsuler Launches to Let Families and Soldiers Send Authentic Future Memories.

We invested heavily in advanced technology to ensure real, human moments are preserved exactly as they are—no AI, no filters. It's a reliable bridge for authentic love to travel through time."

*Shaul Schwartz, Co-Founder*

In an era dominated by artificial intelligence and fleeting digital content, a new platform is bringing back something rare: pure human connection. Capsuler, a groundbreaking digital time-capsule app, has officially launched on the Apple App Store and Google Play, offering a unique way to bridge the gap between generations.

While the tech world is buzzing with AI avatars and synthetic voices, Capsuler takes a different path. We have

invested heavily in advanced preservation technology to ensure that messages remain secure and intact for decades, without any AI interference. The platform allows users to record video, audio, and text messages that are "locked" and scheduled for delivery years—or even decades—into the future.

## From Grandmothers to Soldiers: Preserving the Human Spirit

The power of Capsuler lies in its raw authenticity. It allows a grandmother to record a video for her newborn grandson, to be opened only on his 18th birthday. With Capsuler, she isn't sending a file; she is sending a piece of time. It is her real smile and genuine wisdom, preserved in a digital vault.

Similarly, Capsuler serves as a vital bridge for soldiers serving on the front lines. In times of uncertainty, it gives them the peace of mind to record messages for their loved ones—a birthday wish for a daughter or words of strength for a spouse—to be unlocked at the perfect moment in the future.

"We wanted to create a space where emotions don't expire," says the developer of Capsuler.

"Whether it's a grandmother's secret recipe or a soldier's message home, these moments deserve the truth. We chose high-end storage technology over AI 'enhancements' because a family's legacy should be real, not simulated."

#### Key Features of Capsuler:

**Time-Locked Messaging:** Schedule videos, voice notes, or photos to unlock on a specific future date.

**Human-Centric Tech:** No AI filters or generated content—just raw, authentic memories preserved by robust engineering.

**Secure Storage:** End-to-end encryption ensures that your "Capsulas" remain private until they are delivered.

**Seamless Connection:** Sync with contacts to ensure your loved ones receive their messages exactly when the time is right.

Representing a secure, technology-driven vault designed to preserve authentic human memories for future generations

#### Availability:

Capsuler is available for download today on the [iOS App Store](#) and [Google Play Store](#).

#### About Capsuler:

Capsuler is a platform dedicated to preserving meaningful human connections through time-based messaging. By focusing on authenticity and advanced preservation technology, Capsuler helps users create a lasting digital heritage.
