

# Twin Sun Developer Patrick Billingsley Joins Flutter Contributor Ranks

---

*Nashville software firm now has two Flutter contributors on staff.*

NASHVILLE, TN, UNITED STATES, February 4, 2026 /EINPresswire.com/ -- [Twin Sun, LLC](#) announces that software developer Patrick Billingsley is officially a contributor to Google's Flutter framework, marking Twin Sun's third accepted improvement to Flutter's core codebase.

Billingsley's contribution addresses a longstanding issue where the software keyboard could obscure interface elements rendered in Flutter's Overlay widget. The fix ensures that critical display information propagates correctly to overlay components, preventing common usability problems in mobile apps. The fix has been merged into the Flutter framework and will be shipped in an upcoming release.

"Contributing to the Flutter framework itself demonstrates how deeply our team understands the technology," said Dave Lane, CEO of Twin Sun. "That expertise shows up in every client project we deliver."

Billingsley joins CTO Jami Couch as Twin Sun's second Flutter contributor. Couch was awarded a Google Open Source Peer Bonus in 2023 for his contributions to Scribble support on iPad and text editing improvements on iOS devices.

Twin Sun adopted Flutter as its primary mobile development framework in 2018. The Nashville-based firm has delivered Flutter applications for clients including Artful Agenda and Objective Zero, and maintains several open source Flutter libraries.

Twin Sun is a custom software development company based in Nashville, Tennessee. The firm specializes in mobile and web application development, AI integration, and rescuing troubled software projects. Twin Sun maintains a 90%+ client retention rate and delivers 100% of its projects.
