

Argus Enterprise Inc. Launches Morpheus™ V2

Morpheus is a breakthrough data transformation solution that reduces ERP Migration Efforts up to 90%.

JUPITER, FL, UNITED STATES, February 17, 2026 /EINPresswire.com/ -- Argus Enterprise Inc. today announced the launch of [Morpheus™ V2](#), an intelligent, end-to-end data transformation solution designed to dramatically simplify and accelerate ERP data migration for manufacturers, ERP system implementors, and data migration project teams seeking a faster, more reliable way to modernize their systems.

“

Morpheus was built to remove one of the biggest obstacles in ERP modernization: complex, messy, and error-prone data migration.”

Leonard Chapman

With digital transformation now a competitive necessity, organizations struggle with legacy data locked in outdated formats, fragmented sources, and inconsistent structures. Morpheus eliminates these bottlenecks by providing a smart, fast, and reliable platform that ingests, transforms, validates, and loads ERP-ready data, all with a fraction of the time and labor traditionally required.

“Morpheus was built to remove one of the biggest obstacles in ERP modernization: complex, messy, and

error-prone data migration,” said Leonard Chapman, Chief Operations Officer, Argus Enterprise Inc. “By using AI mapping, easy transformation tools and data validation in-process, Morpheus enables teams to move from uncertainty to confidence, without the pain, delays, or cost overruns that typically plague ERP data migration projects.”

A New Standard for ERP Data Migration

Morpheus introduces a streamlined, repeatable workflow built around four core pillars:

INGEST: Say Goodbye to Messy Legacy Data.

Morpheus easily accepts data from disparate, outdated systems and prepares it for clean

transformation. Its predefined templates and phased approach eliminate guesswork and manual cleanup, providing teams with a reliable foundation to start.

Drag & drop files onto the canvas, select the output pre-configured templates, and leverage AI mapping tools, visual field mappings, and validation rules to complete the process.

TRANSFORM: Transform Once. Reuse Everywhere.

At the core of Morpheus is a powerful, rules-based transformation engine that supports repeatable, scalable data operations across implementations, upgrades, and new module rollouts. As business needs evolve, rules and mappings can be easily updated, enabling continuous improvement without starting from scratch.

This reusable structure not only enhances long-term efficiency but also provides significant cost savings for partners, consultants, and internal teams managing multiple ERP projects.

VALIDATE: Accurate Data the First Time.

Before final load, users can preview results, identify issues, and correct potential discrepancies early. This reduces rework, minimizes risk, avoids common migration errors, and ensures clean, compliant, trustworthy data.

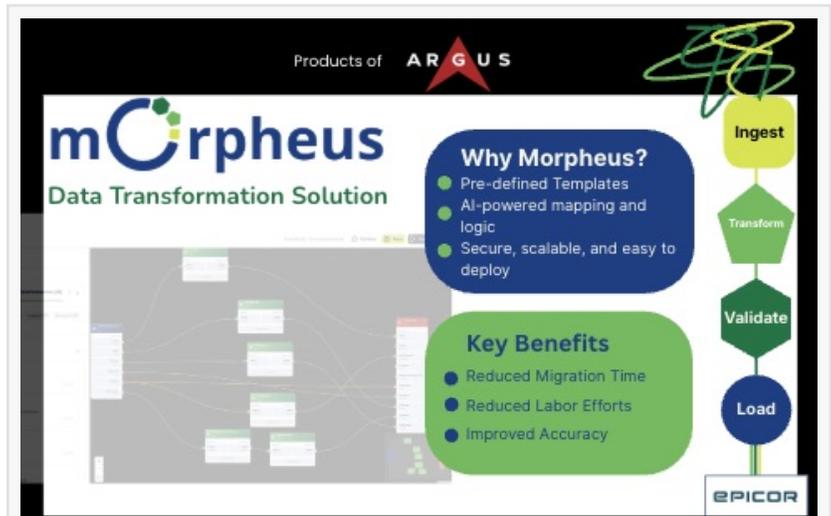

LOAD: Your Data, ERP-Ready

Morpheus delivers fully transformed, validated data ready for seamless migration into the target ERP environment. The result: shorter go-live timelines, improved accuracy, and minimized project disruption.

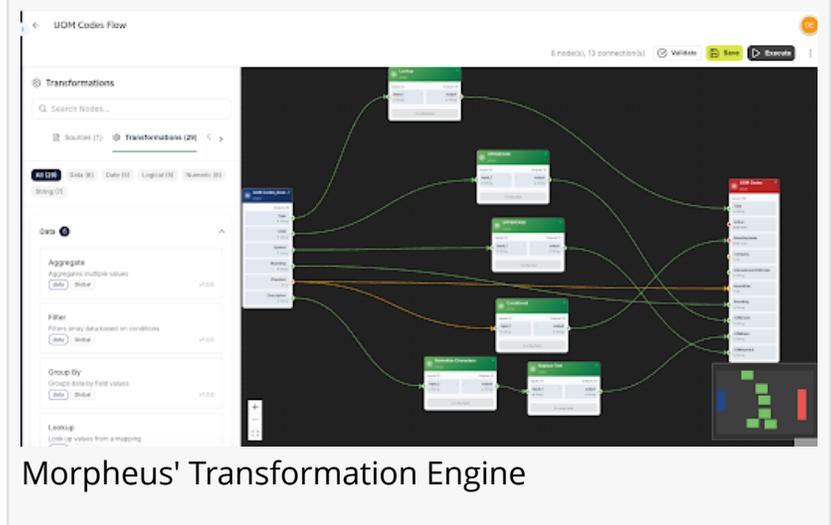

Delivering Measurable Impact

Early users report:

- Up to 90% reduction in data migration project completion time
- Go Live within Days NOT Months
- Near-zero errors and requirement mismatches

Morpheus at a glance

Morpheus' Transformation Engine

- Eliminate reliance on large IT teams or manual spreadsheet processes
- Full, real-time visibility across integrated implementation teams
- Built-in dashboards deliver real-time, defensible metrics on program execution

“Morpheus gives manufacturers the tools to modernize with speed and precision,” said Leonard Chapman. “Whether you’re launching a new ERP system, upgrading an existing platform, or adding new functionality, Morpheus removes the friction so you can focus on growth.”

Availability

Morpheus is now in use by implementation partners, IT leaders, and manufacturing organizations, accelerating ERP modernization on [EPICOR’s Kinetic ERP system](#), without adding complexity or IT overhead. About Argus Enterprise Inc.

Argus Enterprise Inc. designs software that makes ERP execution work at any scale. With Morpheus, manufacturers replace spreadsheet-driven processes with enforced data integrity, faster programs, and a single operational truth across teams.
