

Vistrada Achieves SOC 2 Type II Certification for Data Security and Operational Controls

Independent audit confirms the effectiveness of Vistrada's security controls over time, reinforcing enterprise-grade data protection.

NEW YORK, NY, UNITED STATES, February 5, 2026 /EINPresswire.com/ -- Vistrada LLC announced

“

This SOC 2 Type II report demonstrates that our controls scale with our growth and strengthen our clients' confidence as we continue expanding our services.”

*Royce Markose, Chief
Information Security Officer at
Vistrada*

today that it has achieved SOC 2 Type II compliance in accordance with the [American Institute of Certified Public Accountants \(AICPA\)](#) Trust Services Criteria for Security. This achievement reflects Vistrada's continued commitment to maintaining robust security controls and demonstrates the operational effectiveness of those controls over an extended review period.

SOC 2 Type II certification provides independent, third-party validation that Vistrada's systems and processes are designed and operating effectively to protect customer data. Unlike an [SOC 2 Type I report](#), which evaluates controls at a specific point in time, a Type II report assesses

the ongoing performance of those controls, offering customers a higher level of assurance.

“Strong security programs accelerate business; they don't slow it down,” said Royce Markose, Chief Information Security Officer at Vistrada. “This SOC 2 Type II report demonstrates that our controls scale with our growth and support our clients' confidence as we continue expanding our services.”

The SOC 2 Type II audit was conducted by [Prescient Assurance](#), a leading provider of security and compliance attestation services for B2B companies worldwide. Prescient Assurance is a registered public accounting firm in the United States and Canada and delivers a range of risk management and assurance services, including SOC 2, PCI, ISO, NIST, GDPR, CCPA, HIPAA, and CSA STAR.

Achieving an unqualified opinion on a SOC 2 Type II report reinforces Vistrada's commitment to enterprise-grade security and compliance and provides current and prospective customers with confidence that their data is protected by consistently applied and well-managed controls.
