

The Motor Vehicles Market is Expected to Grow at a CAGR of 7.7% Between 2026 and 2030, Reaching \$3995.38 Billion

The Business Research Company's Motor Vehicles Global Market Report 2026 - Market Size, Trends, And Forecast 2026-2035

LONDON, GREATER LONDON, UNITED KINGDOM, February 9, 2026

/EINPresswire.com/ -- The motor

vehicles industry has experienced

robust growth in recent years, driven by various factors such as rising personal vehicle ownership and expanding infrastructure. As the market evolves, new technologies and shifting consumer preferences continue to shape its future trajectory. Let's explore the current market size, key growth drivers, regional insights, and significant trends influencing the motor vehicles sector.

Current Market Size and Growth [Outlook for the Motor Vehicles Market](#)

The motor vehicles market has witnessed substantial expansion, with its value set to rise from \$2785.95 billion in 2025 to \$2972.06 billion in 2026, marking a compound annual growth rate (CAGR) of 6.7%. This historical growth has been fueled by increasing personal vehicle ownership, development of road networks, greater affordability of mass-market cars, ongoing urbanization, and widespread use of fuel-powered engines.

Looking ahead, the motor vehicles market is expected to continue its strong upward trajectory, reaching \$3995.38 billion by 2030 at a CAGR of 7.7%. Factors driving this future growth include stricter emissions regulations, a rapid shift toward electric vehicles, growing demand for smart mobility options, improvements in battery technology, and an expanding shared mobility sector. Emerging trends shaping the market during this period involve higher electric vehicle adoption, integration of advanced driver assistance systems, growth in connected vehicle technologies, broader availability of hybrid powertrains, and enhanced focus on vehicle safety features.

[Understanding Motor Vehicles and Their Power Sources](#)

Motor vehicles encompass any land-based modes of transport not powered by human effort. This category includes cars, motorbikes, autocycles, and slow-moving vehicles. Typically, these vehicles are propelled by an engine or motor, which may be an internal combustion engine, an electric motor, or a combination of both found in hybrid and plug-in hybrid electric vehicles.

What is Accelerating Growth in the Global Motor Vehicles Market?

One of the most significant forces propelling the motor vehicles market is the rising demand for electric vehicles (EVs). EVs operate using one or more electric motors powered primarily by electricity stored in batteries or other energy storage systems. These vehicles benefit from advances in automotive technology that improve performance, sustainability, and overall user experience, resulting in a major transformation within the industry.

For example, in July 2023, the International Energy Agency, an intergovernmental organization based in France, reported that electric vehicle sales reached 10 million units in 2022 and are projected to increase to 14 million units in 2023. This clear surge in EV adoption is a key factor driving the motor vehicles market forward.
