

Biosurfactants Market Projected to Reach \$7.95 Billion by 2030 with an 8.8% CAGR

*The Business Research Company's
Biosurfactants Global Market Report
2026 – Market Size, Trends, And Forecast
2026-2035*

LONDON, GREATER LONDON, UNITED
KINGDOM, February 9, 2026
/EINPresswire.com/ -- The

[biosurfactants market](#) has witnessed

significant expansion recently, fueled by growing interest in sustainable and eco-friendly alternatives across various industries. As global awareness about environmental impacts increases, biosurfactants are gaining traction for their versatile applications and greener profile. Let's explore the market's current size, growth drivers, regional dynamics, and emerging trends shaping its future.

Forecast Outlook and Market Size for the Biosurfactants Market from 2025 to 2030

The biosurfactants market has experienced robust growth over recent years. It is projected to rise from \$5.17 billion in 2025 to \$5.67 billion in 2026, achieving a compound annual growth rate (CAGR) of 9.7%. This growth during the historical period is largely attributed to heightened environmental concerns associated with synthetic surfactants, an increase in bio-based chemical production, broader adoption within the food and personal care sectors, advancements in fermentation technologies, and the availability of microbial production platforms.

Looking ahead, the market is expected to expand further, reaching \$7.95 billion by 2030 with a CAGR of 8.8%. Growth in this forecast period is driven by stricter regulations governing chemical surfactants, rising demand for sustainable product formulations, wider application of bioremediation technologies, increased investment in industrial biotechnology, and growing incorporation of biosurfactants in pharmaceutical manufacturing.

Understanding the Nature and Uses of Biosurfactants

Biosurfactants are a diverse class of molecules characterized by a polar (hydrophilic) head and a

non-polar (hydrophobic) tail. These compounds are produced by various microorganisms such as *Acinetobacter* species, *Bacillus* species, *Candida antarctica*, and *Pseudomonas aeruginosa*. Due to their unique structure and biological origin, biosurfactants serve as effective substitutes for synthetic surfactants in numerous industrial applications. These include lubrication, wetting, softening, dye fixation, emulsification, dispersion stabilization, foaming control, and anti-foaming. They are employed extensively in food production, biomedical and pharmaceutical sectors, and organic bioremediation processes.

Key Factors Driving Growth in the [Biosurfactants Market Report](#)

One of the primary forces propelling the biosurfactants market forward is the increasing demand for personal care products. These products encompass items used for hygiene, grooming, and appearance enhancement, such as skincare, haircare, oral care, and cosmetics. Growing consumer awareness about health and hygiene is significantly influencing this demand. Biosurfactants improve personal care formulations by enhancing cleansing efficacy, providing gentle action, and maintaining product stability.

For example, in September 2024, data from the Bureau of Labor Statistics, a US government agency, showed that spending on personal care products and services increased by 9.7% from 2022 to 2023. Despite this rise, the share of personal care within total annual expenditures held steady at 1.2% during both years. This trend highlights the sustained growth opportunity for biosurfactants in personal care applications.

Regions Leading the Biosurfactants Market and Future Growth Prospects

In 2025, Western Europe held the largest share of the global biosurfactants market. However, the Asia-Pacific region is anticipated to be the fastest-growing market during the forecast period. The biosurfactants market report covers a comprehensive range of regions, including Asia-Pacific, South East Asia, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa, providing a broad perspective on global market trends and opportunities.
