

Leading the Way in Safe, Eco-Friendly Dry Cleaning Practices

The Dependable Difference in Cleaning technology

QUINCY, MA, UNITED STATES, February 9, 2026 /EINPresswire.com/ -- In light of the Environmental Protection Agency's (E.P.A.) recent decision to ban perchloroethylene (Perc) in dry cleaning, Dependable Cleaners proudly highlights its long-standing commitment to eco-friendly and safe cleaning solutions. As an industry pioneer, Dependable Cleaners transitioned away from Perc over 20 years ago, adopting the innovative [GreenEarth](#) Cleaning System to ensure both superior garment care and environmental sustainability.

Trust Care Excellence Dependable Cleaners

The GreenEarth Cleaning solution uses a proprietary pure silicone fluid derived from natural sand. This groundbreaking solution is non-toxic, safe for the environment, and breaks down naturally into sand (SiO₂), water (H₂O), and carbon dioxide (CO₂). Its safety and sustainability have earned the system recognition, including exemption from regulation by the U.S. E.P.A. for use in dry cleaning and other applications.

“

Exceptional care for the clothes you love. Care you can feel. Quality you can trust.”

Dependable Cleaners

“Dependable Cleaners’ decision to eliminate Perc decades ago underscores our unwavering commitment to the health of our clients, employees, and the planet,” said

Christa Hagearty, CEO of Dependable Cleaners. “By embracing innovative technologies like using GreenEarth Cleaning solutions, we not only provide exceptional garment care but also lead the industry in environmental responsibility.”

For more than 80 years, Dependable Cleaners has set the benchmark for excellence in

professional dry cleaning and laundry services. With 12 locations and a reputation for quality, the company continues to prioritize sustainability through initiatives like GreenEarth Cleaning. These efforts demonstrate its leadership in reducing the environmental impact of garment care while maintaining the highest service standards.
