

Baltimore Private Schools Funding Opportunity for Essential Cybersecurity Services

With a 60-day window for key grant opportunities approaching, the firm is offering specialized "readiness-plans" to help private school administration.

BALTIMORE, MD, UNITED STATES, February 10, 2026 /EINPresswire.com/ -- To help local schools

Our mission is to ensure no school is left behind for lack of budget. This 60-day window is a rare chance to bridge that gap and build a safe, innovative foundation."

Kevin Armentrout

enhance student safety and classroom technology without straining their budgets, [CZ Tech Solutions](#) is now providing specialized support for upcoming grant opportunities. With a 60-day window approaching for key funding, the Baltimore-based firm is working alongside school leaders to prepare readiness-plans that turn grant potential into reality.

Success in a Catholic school environment requires more than just technical skill; it requires an understanding of the

community it serves. CZ Tech Solutions provides this specialized stewardship by focusing exclusively on school infrastructure and safety. This niche expertise allows us to design solutions that are tailor-made for the classroom, ensuring that every grant-funded project aligns with both the school's strategic goals and the safety mandates of diocesan leadership.

To ensure these opportunities are accessible to every parish and school, Justin, the firm's IT and Grant Specialist, serves as a dedicated advocate for school leaders. He works one-on-one with administrators to translate their school's vision into a fundable reality, managing the complexities of the grant process so that leadership can remain focused on their primary mission: the students.

Kevin, the owner of CZ Tech Solutions, emphasizes that modernizing a school's infrastructure is a matter of both safety and academic excellence. "We want to remove the financial barriers that keep schools from modernizing," Kevin noted. "This isn't just about new hardware; it's about creating a safe, high-performing learning environment that fits the school's budget and values." By focusing on these core priorities, the firm helps schools achieve significant upgrades without the typical burden of out-of-pocket costs.

With the 60-day funding window fast approaching, CZ Tech Solutions is urging Baltimore-area school and parish leaders to begin the planning phase immediately. Because grant funds are limited and highly competitive, early preparation is essential to ensuring a successful application. Interested administrators are encouraged to schedule a consultation to review their current environment and define their priority safety and technology needs.

About CZ Tech Solutions:

Located in Baltimore Maryland, CZ Tech Solutions provides tailored IT consulting and physical security systems for educational organizations. They specialize in bridging the gap between complex technology and the unique operational needs of schools and parishes.
