*Nidhi Jain, CEO and Founder of CloudEagle.ai*

powered SaaS Security, Management, and Identity Governance platform, today announced its inclusion in the Gartner® Market Guide for [Software Asset Management \(SAM\) Tools for SaaS](#).

As enterprises increasingly rely on hundreds of SaaS and AI applications, traditional SAM tools with limited integrations can’t deliver the visibility, governance, and automation required for modern SaaS environments. Gartner’s Market Guide highlights the growing need for SaaS-focused SAM capabilities that go beyond inventory to address license usage, identity governance, renewals, and security risk.

CloudEagle.ai enables enterprises to optimize their SaaS and AI ecosystem from a unified command center. By correlating data across IT, Security, HR, and Finance, the platform delivers deep usage insights, intelligent identity governance, and automated workflows for onboarding, offboarding, access reviews, license harvesting, and renewals.

“Being included in Gartner’s Market Guide for Software Asset Management Tools for SaaS clearly shows the market shift toward SaaS-first asset management,” said Nidhi Jain, CEO and Founder of CloudEagle.ai. “Enterprises need continuous visibility into SaaS and AI usage, user access, and governance. CloudEagle.ai was built to help organizations scale SaaS and AI securely while delivering measurable cost savings.”

With 500+ direct integrations and agentic AI, CloudEagle.ai helps organizations eliminate [shadow SaaS and AI](#), reduce security risk, and optimize software spend.

Trusted by enterprises such as RingCentral, Automation Anywhere, Shiji, and Rec Room,

CloudEagle.ai delivers continuous lifecycle management across SaaS and AI applications with onboarding in as little as 30 minutes. To date, the platform has processed over \$20B in software spend and delivered \$2B+ in realized savings.
