

Advanced PicoWay® Laser Treatments Now Available at Elysium Laser

Elysium Laser expands services with advanced tattoo removal and skin rejuvenation treatments in Grand Junction, CO

GRAND JUNCTION, CO, UNITED STATES, February 9, 2026 /EINPresswire.com/ -- [Elysium Laser](#) is

“

The PicoWay® system allows us to expand beyond tattoo removal and offer advanced skin rejuvenation treatments with the same focus on precision and safety.”

Paul Wallis

proud to announce the addition of the [PicoWay®](#) laser system from [Candela](#), expanding its ability to deliver advanced tattoo removal and skin rejuvenation treatments in Grand Junction, Colorado. PicoWay® was named the 2022 Aesthetic Awards Device of the Year and has been featured on NBC’s Today Show for its innovative approach to laser technology.

Designed to work from the inside out, the PicoWay® system delivers ultra-short picosecond pulses that create a non-thermal, photoacoustic effect. This technology allows

for precise targeting of tattoo ink and skin concerns while minimizing damage to surrounding tissue.

For tattoo removal, PicoWay® is engineered to treat a wide range of ink colors and skin types, including difficult-to-treat blue and green pigments. The system supports efficient ink clearance through a series of treatments designed to prioritize safety, precision, and skin integrity.

In addition to tattoo removal, Elysium Laser now offers skin rejuvenation treatments using the PicoWay® Resolve handpiece. Resolve is a fractional, split-beam treatment designed to address common skin concerns such as acne scarring, fine lines, uneven texture, and benign pigmentation. These treatments are non-surgical and typically involve minimal downtime, making them an option for clients seeking visible skin improvements without extended recovery.

“The PicoWay® system allows us to expand beyond tattoo removal and offer advanced skin rejuvenation treatments with the same focus on precision and safety,” said Paul Wallis, Owner of Elysium Laser. “Adding the Resolve handpiece gives us the ability to treat skin texture and pigmentation concerns while continuing to deliver high-quality tattoo removal results.”

Unlike older laser technologies that rely more heavily on heat, PicoWay® utilizes ultra-short pulse durations to target ink and skin concerns with less thermal impact. This approach supports safer treatments across a broader range of skin types and aesthetic goals.

For more information about PicoWay® tattoo removal or skin rejuvenation treatments at Elysium Laser, visit elysium-laser.com or call (970) 812-3711.
