OmniMD Introduces Free Billing Audit Program to Help U.S. Practices Identify and Reduce Claim Denials

OmniMD introduces a no-cost billing audit program to help U.S. practices uncover denial root causes and improve revenue workflow efficiency.

HAWTHORNE, NY, UNITED STATES, February 10, 2026 /EINPresswire.com/ -- U.S.-based healthcare information technology and services provider, today announced the launch of a [Free Medical Billing Audit Program](#) designed to help physician practices and outpatient clinics identify structural causes of claim denials and revenue leakage within their existing billing workflows.

The initiative is focused on supporting practices that are navigating increasing administrative complexity across eligibility verification, clinical documentation, coding accuracy, and payer-specific submission requirements. Rather than offering generalized benchmarks or automated summaries, the OmniMD audit is structured to provide practice-specific insights grounded in real claim workflows, documentation patterns, and denial trends.

𝗪𝗵𝘆 𝗗𝗲𝗻𝗶𝗮𝗹 𝗥𝗼𝗼𝘁-𝗖𝗮𝘂𝘀𝗲 𝗩𝗶𝘀𝗶𝗯𝗶𝗹𝗶𝘁𝘆 𝗠𝗮𝘁𝘁𝗲𝗿𝘀

Claim denials remain a material operational burden for U.S. healthcare practices, often stemming from fragmented documentation, inconsistent coding practices, delayed charge capture, and misalignment between clinical and billing teams. While many practices invest in [electronic health records (EHRs)](#) or clearinghouse tools, these systems alone do not always surface the root causes behind denials or delayed reimbursements.

OmniMD's Free Billing Audit Program is designed to examine these gaps without disrupting daily operations. The audit reviews a defined sample of historical claims, documentation workflows,

> **"** The goal is not to sell software, but to help practices clearly understand where their billing workflows break down and why claims are denied."
> *Divan Dave, CEO, OmniMD*

and billing processes to identify:
Recurring denial patterns by payer and service type

 Documentation gaps affecting medical necessity or coding validation

 Workflow breakdowns between front desk, clinical staff, and billing teams

 Opportunities to improve first-pass claim acceptance through process alignment

The findings are delivered in a structured summary that prioritizes operational clarity over volume, allowing practices to make informed decisions about corrective actions.

𝗧𝗿𝗮𝗻𝘀𝗽𝗮𝗿𝗲𝗻𝘁, 𝗡𝗼𝗻-𝗣𝗿𝗼𝗺𝗼𝘁𝗶𝗼𝗻𝗮𝗹 𝗠𝗲𝘁𝗵𝗼𝗱𝗼𝗹𝗼𝗴𝘆

Unlike marketing-driven assessments, the OmniMD audit does not rely on assumed savings projections or standardized performance scores. Instead, it emphasizes transparency, traceability, and relevance to the individual practice's operating environment.

The program reflects OmniMD's broader experience supporting U.S. healthcare organizations across EHR systems, [revenue cycle management (RCM)](#), interoperability frameworks, and clinical documentation workflows. Insights from the audit are informed by real-world exposure to payer rules, specialty-specific billing requirements, and compliance-driven documentation standards.

𝗢𝗺𝗻𝗶𝗠𝗗'𝘀 𝗕𝗿𝗼𝗮𝗱𝗲𝗿 𝗔𝗜-𝗘𝗻𝗮𝗯𝗹𝗲𝗱 𝗢𝗽𝗲𝗿𝗮𝘁𝗶𝗼𝗻𝘀 𝗜𝗻𝗳𝗿𝗮𝘀𝘁𝗿𝘂𝗰𝘁𝘂𝗿𝗲

In parallel with the Free Billing Audit Program, OmniMD continues to expand its AI-enabled healthcare operations platform designed to reduce administrative burden across the care continuum. The company's AI-driven solutions support areas such as clinical documentation automation, eligibility verification, front desk workflows, and revenue cycle optimization.

These tools are built to integrate with existing EHR and practice management systems, enabling practices to improve accuracy, reduce manual effort, and gain earlier visibility into operational risks without replacing their current technology stack. OmniMD's approach emphasizes assistive automation-using AI to support staff decision-making rather than replace clinical or billing judgment.

𝗔𝘃𝗮𝗶𝗹𝗮𝗯𝗶𝗹𝗶𝘁𝘆 𝗮𝗻𝗱 𝗣𝗿𝗮𝗰𝘁𝗶𝗰𝗲 𝗘𝗹𝗶𝗴𝗶𝗯𝗶𝗹𝗶𝘁𝘆

The Free Billing Audit Program is intended for independent practices, specialty clinics, and group practices seeking clearer insight into why claims are denied or delayed, and where operational adjustments may have the greatest impact.

Participation does not require changing billing vendors, EHR systems, or entering long-term commitments. Practices retain full control over whether and how they act on the findings.

░░░░░░░░░░░░░

The Free Billing Audit Program is currently available to U.S.-based healthcare practices on a limited basis.

░░░░░ ░░░░░░

OmniMD provides healthcare IT and services solutions for U.S. medical practices, including electronic health records, revenue cycle management, interoperability support, and practice operations technology. The company works with practices across multiple specialties to support compliant, efficient, and connected healthcare delivery.
