

RGF® Environmental Group Launches Microcon® 150 Whole Home Media Filter to Deliver Cleaner Indoor Air

PORT OF PALM BEACH, FL, UNITED STATES, February 11, 2026

/EINPresswire.com/ -- [RGF®](#)

[Environmental Group](#), Inc., a leader in indoor air quality and environmental solutions, announces the launch of the U.S.-manufactured [Microcon® 150](#) Whole Home Media Filter, a high-performance filtration system designed to significantly improve indoor air quality while maintaining optimal HVAC system efficiency.

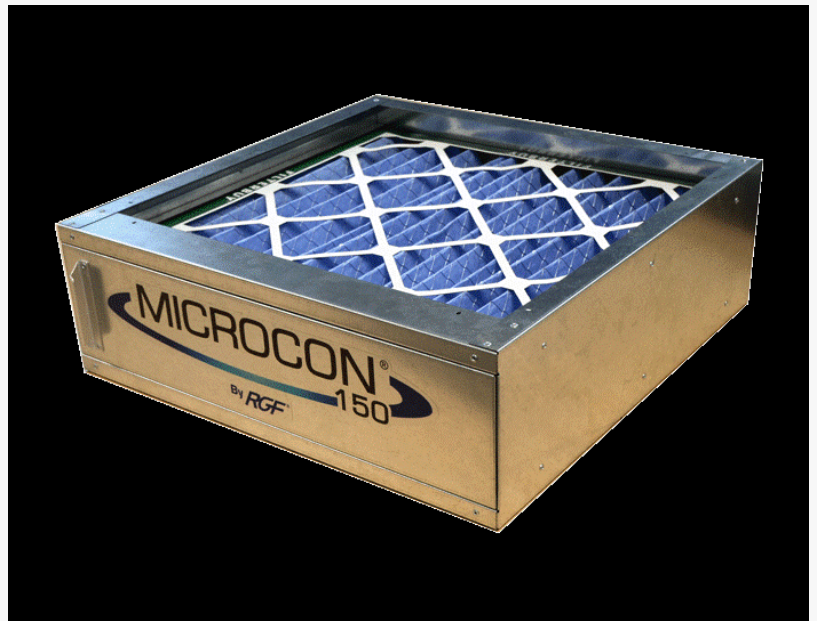

As homeowners and building professionals place greater emphasis on healthier indoor environments, the Microcon® 150 provides advanced,

whole-home particulate filtration using a deep 4-inch pleated media filter available in MERV 11 or MERV 13 ratings. This enhanced depth allows the filter to capture more airborne contaminants than standard 1-inch filters, including dust, pollen, mold spores, pet dander, and other common indoor pollutants.

“

With today's tighter home building envelopes and increased focus on health and comfort, effective whole-home air filtration is essential.”

Paul Siegl, National Sales Manager

Microcon® 150 Whole Home Media Filter

“With today's tighter home building envelopes and increased focus on health and comfort, effective whole-home air filtration is essential,” said Paul Siegl, National Sales Manager at RGF® Environmental Group, Inc. “The Microcon® 150 delivers superior particulate capture and long-lasting performance while maintaining balanced airflow and system efficiency. Combining Microcon® 150 with our award-winning whole home air purifiers offers the ultimate IAQ solution.”

Key Features and Benefits

- High-Efficiency Filtration: Deep 4-inch media filter available in MERV 11 or MERV 13 sealed in cabinet for enhanced particulate capture and improved indoor air quality
- HVAC-Friendly Performance: Designed for low pressure drop with MERV 13 filter at 0.315" W.C.
- Durable Construction: Heavy-duty 22-gauge galvanized steel cabinet ensures long-term durability and corrosion resistance
- Flexible Installation Options: Multiple size configurations and installation orientations simplify integration into new or existing HVAC systems
- Easy Maintenance: Magnetic access door allows for quick, tool-free filter replacement

Ideal for single-family homes, apartments, condominiums, and light commercial applications, RGF's Microcon® 150 provides contractors and homeowners with a reliable solution for cleaner indoor air.

The Microcon® 150 is manufactured in the United States at RGF's vertically integrated, environmentally friendly ISO 9001:2015 certified facility and is now available through RGF's existing HVAC distribution channels.
