

# E4 Supports Schaumburg School District 54's Energy Goals with Community Solar Enrollment

---

CHICAGO, IL, UNITED STATES, February 12, 2026 /EINPresswire.com/ -- E4, a leading energy and sustainability consulting firm, has supported Schaumburg School District 54 in joining a Community Solar program, helping the district reduce energy costs while advancing renewable energy access within the Illinois community.

Community Solar programs allow large public institutions, like school districts, to benefit from off-site solar energy projects by subscribing to a portion of a shared solar array. In return, the district receives credits on its utility bills based on the energy produced by its share—providing significant financial savings without the need for on-site solar installations or upfront capital investment.

As part of this initiative, E4 worked closely with District 54 to assess energy usage patterns across its facilities, identify optimal subscription opportunities, and manage the complete enrollment and contract process. By serving as a strategic energy advisor, E4 simplified a complex regulatory landscape, allowing the district to confidently move forward with a clean energy solution that aligns with its long-term operational and fiscal goals.

"Partnering with educational institutions like Schaumburg School District 54 is at the core of our mission," stated Jonathan Siegle, Founder and Managing Member at E4. "Their commitment to providing a high-quality environment for students now extends to environmental responsibility. We're proud to support the district as it takes these meaningful steps toward a more sustainable and cost-effective future."

Schaumburg School District 54 is a premier elementary school district in Illinois, serving students in Schaumburg and surrounding communities. By participating in Community Solar, the district is not only stabilizing its energy expenses but also playing an active role in building a cleaner, more resilient energy grid for the region.

"Participating in Community Solar reflects our broader commitment to both fiscal responsibility and the well-being of our community," stated Chris Bingen, Assistant Superintendent of Facilities, Maintenance and Security. "E4 provided the expertise and support we needed to evaluate our options and take a confident step towards our renewable energy goals without any disruption to our daily school operations."

By subscribing to Community Solar, Schaumburg School District 54 is helping expand access to renewable energy across Illinois, demonstrating that public schools can lead the way in environmental stewardship.

#### About E4

E4 is a Chicago-based energy and sustainability consulting firm dedicated to helping businesses and municipalities achieve their energy goals. The firm specializes in Community Solar enrollment, Battery Storage, and strategic energy planning, delivering solutions that reduce costs and enhance environmental performance.
