

Postmortem Pathology Opens Sacramento Office for Private Autopsies for Families, Attorneys, & Healthcare Investigations

The new facility offers a crucial resource for those seeking answers regarding cause of death, contributing medical conditions, and complex postmortem questions

SACRAMENTO, CA, UNITED STATES, February 10, 2026 /EINPresswire.com/ -- Postmortem Pathology today announced the opening of its new office, expanding access to [private autopsy services in Sacramento](#) for families, legal professionals, and healthcare organizations throughout the region. The new facility offers a crucial resource for those seeking definitive answers regarding cause of death, contributing medical conditions, and other complex postmortem questions.

Postmortem Pathology specializes in providing independent, high-quality [private autopsies in Sacramento](#) conducted by board-certified forensic pathologists. These services are vital for families seeking closure after an unexpected loss, attorneys requiring detailed evidence for civil or criminal litigation, and healthcare facilities aiming to enhance quality assurance and medical understanding. The Sacramento office is fully equipped to handle a range of cases with the utmost professionalism and sensitivity.

"Losing someone close is one of life's hardest moments, often accompanied by uncertainty and unresolved questions," added Dan Lingamfelter, Lead Pathologist "We are committed to bringing clarity and comfort through thorough, respectful, and scientifically grounded pathology services." "Our goal is to provide clarity and peace of mind through meticulous, compassionate, and expert pathological investigation. We believe everyone deserves access to the truth, and our expansion into Sacramento helps us better serve this need within the community."

The services offered are distinct from standard hospital or coroner-mandated procedures, providing a private and client-directed alternative. This allows for a focused investigation tailored to the specific concerns of the family or instructing party. The findings can be instrumental in resolving insurance claims, addressing potential medical malpractice concerns, and understanding hereditary diseases that may impact surviving family members.

"For the legal and medical communities, an independent [autopsy service in Sacramento](#) can be the most critical tool for case resolution and clinical review," added Dan Lingamfelter. "Our specialists deliver objective, scientifically grounded reports designed to meet the highest

standards of both legal review and professional medical evaluation. We are committed to upholding the highest standards of scientific integrity in every examination we perform."
