

Remo Software just launched Remo Uncover a Simplified Forensics and Evidence Collection Tool

Quickly get to depth of things with Easy Evidence Collection. Remo Software latest release - Remo Uncover is a simple forensics tool for Microsoft Windows.

CUPERTINO, CA, UNITED STATES,
February 11, 2026 /EINPresswire.com/
-- [Remo Software](#) today announced the

launch of Remo Uncover. A simple computer forensics tool that enables anyone to reveal how their laptop or PC was used over a given period. Remo Uncover streamlines any probe for suspicious activity by collecting and organizing key system and user activity traces into organized action logs, helping users reduce time spent digging through raw data logs and focus on piecing the puzzle.

“

Digital data can make or break investigations. The evidence on PC is buried across multiple logs & system traces. Remo Uncover is a basic forensics tool which makes this raw data easy to understand.”

Omer Faiyaz - CEO @ Remo Software

Get To The Bottom Of Things Quicker with Simplified Evidence Collection

Every investigation begins with scattered clues and traces—login anomalies, USB usage, suspicious file activity, and unexplained configuration changes.

Remo Uncover takes care of all the grunt work by collecting and organizing logs of key activities that could help you confirm your suspicions.

- Run targeted forensic scans: Collect high-value evidence from common Windows data sources such as event logs, system timelines, device history, and user activity traces.
- Organize findings into clear categories: Present results in a structured format that helps users pick up trails that point towards the truth.
- Reduce manual effort and errors: Minimize time spent scrounging for a scent. Devote your attention to connecting the dots!

Investigation- Ready Insights for Common Forensic Use Cases

Remo Uncover is built to support everyday investigative scenarios. Every suspicion requires speed, clarity, and defensible reporting matter. The tool helps users reveal and validate traces such as:

- Device activity (e.g., USB insertions, external storage usage, connected device history)
- User activity (e.g., logins/logouts, failed attempts, account usage patterns)
- System behavior (e.g., key event log patterns, timeline-based activity, persistence indicators)
- Network and configuration signals (e.g., adapters, changes, activity traces relevant to endpoint posture)

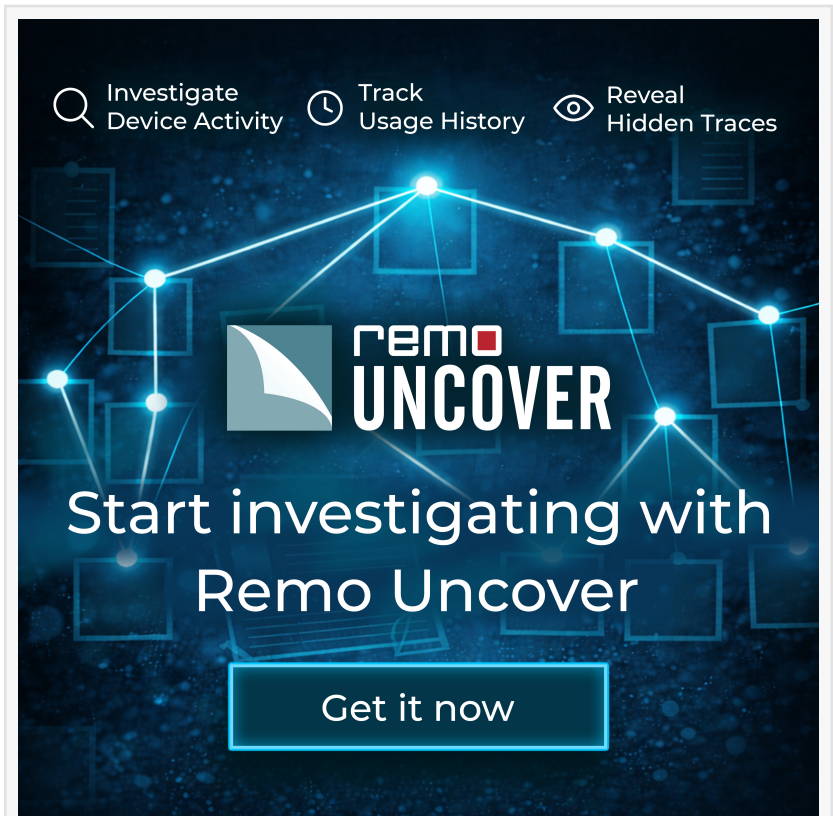

By turning fragmented breadcrumbs into organized reports, Remo Uncover helps users reveal hidden agendas and document suspicious activity more consistently.

Key Benefits of Remo Uncover

- Skip Manual Clue Hunting: Quickly surface hidden activity indicators without deep manual digging.
- Clarity over raw logs: Convert diverse Windows activity into a structured, review-friendly format.
- Birds-eye view of all documented activity: Generate structured reports that confirm a hunch or probe into grey areas.
- Reduced operational overhead: Improve investigation speed while minimizing the need for specialized forensic tools.

About Remo Software

Remo Software, established in 2011, is a provider of data recovery, data management, and endpoint utility solutions. With customers spanning over 100+ countries and a portfolio of software applications across Windows, Mac, Android, and iOS platforms, Remo Software is known for building user-friendly tools that simplify complex technical workflows.

The advertisement banner features a dark blue background with a glowing network of nodes and lines. At the top, three icons represent the tool's capabilities: a magnifying glass for 'Investigate Device Activity', a clock for 'Track Usage History', and an eye for 'Reveal Hidden Traces'. The central focus is the 'remo UNCOVER' logo, with 'remo' in a smaller font and 'UNCOVER' in a larger, bold font. Below the logo, the text 'Start investigating with Remo Uncover' is displayed in a large, white, sans-serif font. At the bottom, a prominent blue button with white text says 'Get it now'.

Remo Uncover - Simplified Forensics Tool

This is a smaller version of the advertisement banner described above, featuring the same layout and elements: the top navigation icons, the 'remo UNCOVER' logo, the main headline 'Start investigating with Remo Uncover', and the 'Get it now' button.

Remo Uncover - Simple Forensics Tool

Remo Uncover is available now for Microsoft Windows Users, Android version will be launched soon . To learn more or download a free trial, please visit Remo Software's website.
