

Quetext Launches AI Summarizer Designed to Generate Structured Summaries and Meeting Notes

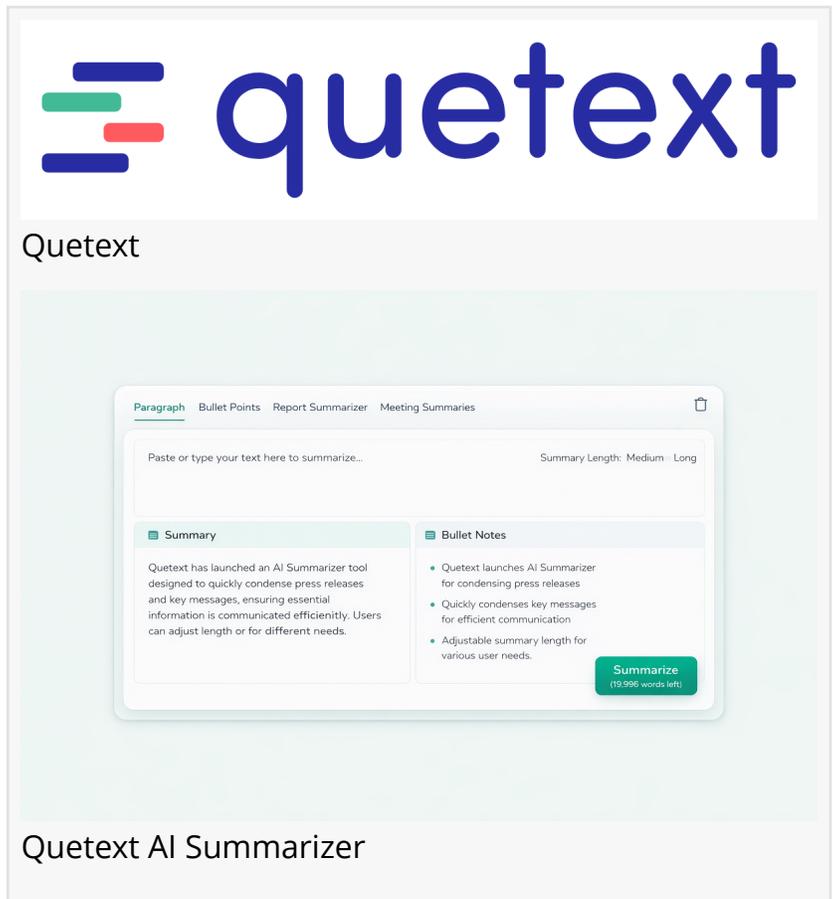

Quetext AI Summarizer creates short, medium, or long summaries in bullets, reports, paragraphs, or meeting notes, now included in Quetext plans.

NEW YORK, NY, UNITED STATES, February 11, 2026 /EINPresswire.com/ -- Quetext announced the launch of AI Summarizer, a new feature which helps to create concise, structured summaries from lengthy pieces of work, in seconds. Designed for students, educators, and professionals, AI Summarizer offers multiple output lengths: Short, Medium, and Long - and multiple formats including Paragraph, Report, Bullet Points, and Meeting Summary.

AI Summarizer is useful when users need speed without losing any meaning in their content, whether they are changing long text into notes, summarizing raw content or capturing and summarizing meeting notes and action items so everyone can understand them. With flexible formats and length controls, users can create a quick overview, a detailed report-style summary, or a skimmable bullet list tailored to the situation.

Quetext's AI Summarizer also works alongside Quetext's core originality and writing tools. Users can summarize source material to capture key ideas, refine wording with AITutorMe Paraphrasing tool, and then verify final drafts using the DeepSearch™ Plagiarism Checker and AI Detector, helping them move faster while staying confident in originality and clarity.

"Most people don't just need a summary; they need a faster way to turn information into something usable," said a Quetext spokesperson. "AI Summarizer helps users move from reading

Quetext AI Summarizer

to output quickly, whether that's study notes, a report outline, or a meeting recap with clear next steps."

Designed for real workflows, not just text reduction.

AI Summarizer supports common use cases across education and work, including:

1. Study notes and revision aids from articles, lectures, and class materials
2. Research takeaways with structured outputs for faster review
3. Bullet-point summaries that make long content easy to scan and share
4. Reports summaries that convert long text into a structured overview
5. Meeting summaries that capture key points, decisions, and action items

Users can paste text, choose the desired format and length, and generate an output they can immediately reuse in documents, emails, or drafts.

A clearer path from source material to finished work:

AI Summarizer is built to facilitate the process of converting raw content into polished writing using an efficient and functional workflow. For many, this process includes beginning with a large amount of text, taking time to rearrange and prioritize key points, rewriting parts of the content for clarity, and finally, checking to make sure that the finished piece is original before submitting it. Quetext allows users to complete those steps in a more efficient manner by combining these processes into a single application and allowing users to move from one step to the next in an orderly way.

1. Summarize - Take lengthy material and condense it into a structured format such as bullet points, reports, paragraphs, or a summary of the meeting.
2. Shape - Use the summarized content from Step 1 and create outlines, highlight key points, or create a document (brief) that is easier to work from.
3. Refine (optional) - Use AITutorMe to paraphrase or enhance readability while maintaining the original meaning.
4. Verify - Run final document through Quetext's DeepSearch™ Plagiarism Checker and AI Detector to help ensure originality and reduce any submission risk.

This approach helps users reduce time spent rereading, reorganizing, and rewriting, especially in content-heavy tasks like academic writing, long reports, and meeting documentation.

AI Summarizer is now available inside Quetext and included across plans with usage limits based on subscription level:

1. Free: 2,000 words per month for AI Summarizer
2. Essential: 25,000 words per month for AI Summarizer
3. Professional: 50,000 words per month for AI Summarizer

Users can access AI Summarizer from their Quetext dashboard and begin summarizing immediately by selecting a format and preferred length.

About Quetext:

Quetext provides originality and writing tools built to support modern content creation. Its DeepSearch™ technology powers an all-in-one Plagiarism Checker, AI Detector, Grammar Checker, AI Summarizer and AITutorMe Paraphrasing Tool. It is designed to help users produce clear, confident, and original work.
