

TYPHON Machinery Elevates Compact Performance with Launch of 'TYPHON Green Series' of Mini Excavators and Skid Steers

COMMERCE, CA, UNITED STATES, February 16, 2026 /EINPresswire.com/ -- TYPHON Machinery is a leading provider of high-performance heavy equipment, specializing in powerful yet maneuverable solutions for construction, landscaping, and agriculture. Our robust lineup features high-efficiency Mini Excavators, Skid Steer Loaders, Forklifts, Wheel Loaders, and Road Rollers.

Why TYPHON Green Series?

The evolution of our brand reaches a new milestone with the official launch of the TYPHON Green Series. This lineup, featuring the [TYPHON KUVUO 4.0](#), [TYPHON TERROR LXV](#), and [TYPHON STOMP V1000](#), was built directly from the feedback of our community. CEO Dennis Tan explains

“

This series signifies the adaptability our customers asked for, ensuring these machines provide the best tight-space performance without sacrificing power.”

Dennis Tan

that the inspiration for this green series came from a surge of customer requests from operators asking for more power in compact designs. We realized there was a massive community of "green lovers" who wanted a machine that looked as tough as it performed. One that remained compact without compromise. We chose the unique green aesthetic to mirror the multi-cam of a soldier, representing a machine that is as strong as a soldier on the battlefield. This series signifies the adaptability our customers asked for, ensuring these

machines provide the best tight-space performance without sacrificing power.

Meet the Green Series Lineup:

Here is a closer look at the three new heavy-hitters joining the TYPHON family.

1. TYPHON KUVUO 4.0 (4 Ton Mini Excavator)

The TYPHON KUVUO 4.0 is the ultimate "tight-space" specialist, a 4-ton mini excavator designed for high-efficiency maneuvering in narrow zones.

Powered by the reliable 25 HP Kubota D1703 engine, it features a zero-tail-swing design, boom swing, and retractable tracks to work flush against walls and obstacles with ease. Its advanced hydraulic system, utilizing a piston pump and multi-way valve, delivers smooth, consistent pressure for a 3106 mm digging depth and precise control over various attachments. Operators benefit from two-speed travel, metal tracks for tough terrain, and effortless pilot joystick controls, all while staying productive year-round in a fully enclosed AC/Heater cabin.

2. TYPHON STOMP V1000 (1.5 Ton Skid Steer Loader)

The TYPHON STOMP V1000 is a compact mini skid steer loader with 1.5-ton operating weight, specifically engineered for narrow-access sites, farms, parks, and residential gardens. Measuring just 980 mm wide, this model is powered by the reliable 24.4 HP Kubota D1105 engine. It delivers a massive 2852 mm lifting height and a 1,720 lbs rated operating capacity, making it perfect for loading high-sided trucks or moving heavy materials in tight urban rows. With its 360° body rotation, intuitive pilot controls, and a reinforced frame built for 30° slopes, the V1000 provides the precision and durability needed to get the toughest jobs done where larger machines simply can't fit.

TYPHON KUVUO 4.0

COMPACT POWER. ELITE PERFORMANCE

-  POWER THAT WORKS HARDER
-  ONE MACHINE. MULTIPLE APPLICATIONS
-  CONTROL MEETS COMFORT

BUILT STRONG. BUILT SMART. BUILT TYPHON

TYPHON KUVUO 4.0, the 4 Ton Workhorse for your Construction Needs

TYPHON STOMP V1000

1.5 TON MINI SKID STEER LOADER

-  BUILT FOR NARROW SPACES
-  KUBOTA D1105-E4 DIESEL ENGINE
-  POWER & PERFORMANCE
-  COMFORTABLE CONTROLS

COMPACT. TOUGH. UNSTOPPABLE

TYPHON STOMP V1000, a Multi-Functional Machine to Get the Job Done

3. TYPHON TERROR LXV (6.6 Ton Mini Excavator)

The TYPHON TERROR LXV is the flagship of the Green Series, a 6.6-ton powerhouse engineered for heavy-duty foundation work and land development. Equipped with the reliable 56.9 HP Kubota V2607 diesel engine, it features advanced load-sensing piston pumps that automatically optimize hydraulic flow for maximum efficiency. Built for durability and precision, it combines a heavy-duty steel track system and two-speed travel with a 360° rotating body and boom swing for effortless maneuvering in tight spots. Complete with a climate-controlled AC/Heater enclosed cabin and high-output hydraulics for versatile attachments, the LXV is the ultimate fusion of strength and operator comfort.
