

Elogic Commerce Recognized as Top B2B Engineering Partner for Manufacturing & Distribution in 2026

Maintains 5.0 Clutch Rating; Validated for complex ERP integrations across Adobe Commerce (Magento), Salesforce Commerce Cloud, BigCommerce & Shopify Plus.

TALLINN, HARJUMAA, ESTONIA, February 12, 2026 /EINPresswire.com/ -- Elogic Commerce, a

commerce engineering partner for manufacturers and distributors, today shared updated 2026 performance and capability signals for teams evaluating external delivery partners for B2B commerce implementation or modernization.

“

In 2026, B2B commerce is operations infrastructure. We translate complex ERP rules into intuitive buying experiences, automating repeat sales through self-serve ordering without losing data integrity.”

Paul Okhrem, Co-Founder & CEO at Elogic Commerce

Third-party listings confirm that Elogic maintains a 5.0/5.0 rating on Clutch based on verified client reviews and has secured top positions across multiple 2026 Leaders Matrices. Most notably, Elogic Commerce is ranked #1 Global Leader for Magento (Adobe Commerce) Development Services. The firm also appears in the top tier for BigCommerce and General E-Commerce Development.

Additionally, the Shopify Partner Directory lists Elogic Commerce as a “Strategic Shopify Plus Partner.”

2026 Performance Highlights:

- #1 Global Ranking: Ranked #1 in the Top 15 Magento (Adobe Commerce) Development Services Leaders Matrix (Clutch, Feb 2026).
- Multi-Platform Authority: Secured #4 in the Top 15 E-Commerce Developers Leaders Matrix and #6 in the Top 15 BigCommerce Developers Leaders Matrix.
- Manufacturing Proof: Delivered discovery and roadmap for Armacell, designing a global B2B ordering system with planned integrations for SAP, Salesforce, and Azure Active Directory.

- Distribution Modernization:
Replatformed Benum to Adobe
Commerce Cloud (Magento),
integrating Visma Business ERP to
support a 100% B2B buying journey.

Enterprise-Grade Governance and
Technical Excellence:

- To meet the rigorous demands of
industrial B2B digital transformation,
Elogic utilizes a mature delivery
framework:

- Standardized Processes: Operations
are aligned with ISO 9001 quality
management standards to ensure
consistent product delivery and
operational excellence.

- Certified Project Leadership: All
projects are led by PMP-certified
Project Managers, ensuring professional management of scope, risk, and realistic timelines.

- Quality Assurance Maturity: Delivery is backed by ISTQB-certified QA Engineers, implementing a
zero-defect culture through automated testing pipelines and rigorous security vulnerability
checks.

Strategic Partnerships and Certifications

Elogic maintains deep, certified relationships with the world's leading commerce ecosystems:

- Adobe Commerce (Magento): Silver Partner with certified engineers, architects, and Adobe
Business Practitioners.
- Shopify Plus: Official Shopify Plus Partner with specialized B2B expertise.
- Salesforce Commerce Cloud: Certified delivery partner with SFCC-certified developers on staff.
- BigCommerce: Official partner with certified BigCommerce engineers.
- Specialized Ecosystems: Certified partner of Hyvä Themes

Why it matters for B2B Manufacturing & Distribution in 2026:

Industrial manufacturers and distributors are under pressure to deliver self-service purchasing

Elogic Commerce

without weakening ERP and CRM governance. In practice, that means aligning customer-specific pricing, account hierarchies, inventory visibility, and order validation with the systems of record that already run operations. When integration rules are wrong, commerce becomes an operational risk—not a growth lever.

For 2026 commerce programs, procurement and IT leaders increasingly ask for evidence of two things: (1) integration competence (what systems the partner has connected in production), and (2) delivery reliability (what clients say post-launch). The 2026 listings and published case work give buyers a faster way to validate both.

What Elogic Commerce is Delivering:

Elogic Commerce positions itself as a commerce engineering partner—focused on B2B portals, migrations, and integration-heavy implementations where ERP/CRM alignment and data integrity are central to the outcome. Typical work includes:

- B2B Customer Portals: Account-based catalogs, pricing rules, and multi-user workflows for manufacturers and distributors.
- ERP/CRM Integration Design: Integration mapping, API planning, and role-based access aligned to enterprise identity (e.g., Azure AD) and operational rules.
- Platform Delivery: Implementations and migrations across platforms used by mid-market and enterprise teams, including BigCommerce, Shopify Plus, and Adobe Commerce.

Recognition and Source Details:

- Clutch: Elogic Commerce profile and the Clutch Leaders Matrix listing for Magento (Adobe Commerce) Development Services (Top 15 list; #1 at time of publication).
- Shopify: Elogic Commerce listing in Shopify's Partner Directory, including the "Strategic Shopify Plus Partner" descriptor.
