President and Chief Software
Architect*

provider of pathology and surgery synoptic reporting software, announces with deep sadness the passing of co-founder John Murphy on February 4, 2026. Mr. Murphy's contributions to healthcare technology and his vision for data-driven medicine have left an enduring impact on the industry.

A native of Newton, Massachusetts, Mr. Murphy earned his undergraduate degree from Babson College and an MBA from Western New England University. His career spanned multiple industries, with significant leadership roles in healthcare finance, including positions as CFO at Cape Cod Hospital and Jordan Hospital. He often referred to himself with characteristic humor as a "reformed hospital CFO."

During his tenure in hospital administration, Mr. Murphy worked extensively with physicians and clinical departments, developing insights into healthcare workflows that would later inform his entrepreneurial vision.

Mr. Murphy switched to the enterprise software business, serving as CFO at Software 2000 (later Infinium) through their initial public offering. A true entrepreneur, he started several other successful technology companies with a core group of colleagues and investors. In 2003, Mr. Murphy co-founded mTuitive with Dr. William O'Toole, driven by a commitment to transform unstructured medical data into actionable clinical intelligence. He recognized that critical knowledge remained inaccessible to physicians and saw an opportunity to empower medical professionals through better information systems. An early advocate for discrete data capture and synoptic reporting, Mr. Murphy built strong relationships throughout the healthcare community with colleagues who shared his commitment to quality improvement.

Beyond his strategic vision, Mr. Murphy was known for his genuine interest in people and his

ability to foster meaningful professional relationships. His energy, curiosity, and interpersonal warmth were integral to mTuitive's culture. Colleagues remember him as someone who consistently challenged the organization to push boundaries in pursuit of better patient care.

"John wasn't just our co-founder—he was the heart of mTuitive," said Peter O'Toole, mTuitive President and Chief Software Architect. "His passion for improving healthcare through technology, combined with his remarkable ability to connect with people, created a lasting legacy that will continue to guide our mission."

Mr. Murphy's vision and leadership have positioned mTuitive as an innovator in healthcare technology, and his influence will continue to shape the company's future.

About mTuitive

mTuitive is revolutionizing reporting, data, and analytical software for digital pathology and surgical oncology. The company's innovative synoptic reporting software aggregates patient data across thousands of reports, providing medical professionals with enhanced insights to elevate standards of care. By capturing all required data and ensuring standards compliance, mTuitive helps hospitals and surgery centers improve efficiency and accuracy. With a commitment to continued innovation, mTuitive is shaping the future of medicine, enabling healthcare professionals to make better decisions and achieve optimal patient outcomes.
