

Real IT Solutions Partners with Apex Visibility to Strengthen AI Search Presence and Regional Market Growth

Real IT Solutions Engages Apex Visibility for Advanced AIEO and SEO Strategy to Expand Digital Authority Across West Michigan

GRAND RAPIDS, MI, UNITED STATES, February 13, 2026 /EINPresswire.com/

-- Real IT Solutions, a leading Managed IT Services Provider headquartered in Grand Rapids, Michigan, has announced a strategic partnership with Apex Visibility to implement a comprehensive AI Engine Optimization (AIEO) and Search Engine Optimization (SEO) campaign designed to strengthen its visibility in both traditional and AI-powered search environments.

“

Search has fundamentally changed. Businesses are no longer just competing for rankings — they are competing for authority within AI-driven results.”

Matt Kahle

As AI-driven search platforms and large language models increasingly shape how businesses are discovered online, Real IT Solutions is proactively aligning its digital strategy with 2026 search trends, focusing on semantic authority, entity recognition, depth of structured data, and brand trust signals.

Matt Kahle, Co-Founder of Real IT Solutions, commented on the partnership:

“Search has fundamentally changed. Businesses are no longer just competing for rankings — they are competing for authority within AI-driven results. Partnering with Apex Visibility allows us to strengthen our digital foundation, increase our presence in AI search environments, and ensure organizations across West Michigan can easily discover and trust Real IT Solutions as their IT partner.”

A Strategic Shift Toward AI Engine Optimization (AIEO)

The partnership represents more than a traditional SEO engagement. Apex Visibility will deploy an advanced AIEO framework that includes:

- Structured Data implementation aligned with semantic entity modeling
- Knowledge graph reinforcement
- Topical authority cluster development
- AI-citable content architecture
- [Enhanced E-E-A-T signal amplification](#)
- Regional search dominance strategy

Unlike legacy SEO models focused solely on keyword rankings, AIEO focuses on ensuring organizations are discoverable within AI-generated responses, knowledge panels, and entity-based search results — where decision-makers increasingly conduct vendor research.

James Curley, Founder of Apex Visibility, stated:

"AI search has shifted visibility from keyword density to entity authority. Our focus with Real IT Solutions is to build a semantic content ecosystem that signals expertise, experience, and trustworthiness across both Google and emerging AI platforms. This ensures long-term digital resilience and measurable growth."

Strengthening Market Presence in West Michigan

[Real IT Solutions provides Managed IT Services](#), cybersecurity, cloud support, and strategic [IT consulting](#) to businesses throughout West Michigan. As organizations continue to modernize infrastructure and prioritize cybersecurity resilience, digital visibility has become a critical growth lever for IT providers.

The campaign will prioritize:

- Expansion of local visibility across Grand Rapids and surrounding markets
- Industry-focused content development
- Authority building within Managed IT Services and cybersecurity
- Technical optimization to support AI-driven indexing

West Michigan's growing business ecosystem demands reliable IT partners capable of delivering

Apex Visibility - SEO Services for Managed Service Providers

scalable, secure solutions. Through this collaboration, Real IT Solutions is positioning itself as a digitally authoritative and regionally trusted technology partner.
