

# KIOSK Information Systems and AOPEN Solve the 'Digital Front Door' Reliability Crisis at HIMSS 2026

*KIOSK + AOPEN: The fanless, commercial-grade solution for reliable healthcare patient engagement. Zero-failure hardware at HIMSS 2026.*

LAS VEGAS, NV, UNITED STATES, February 17, 2026 /EINPresswire.com/ -- At HIMSS 2026 (Booth #5647), [KIOSK Information Systems](#) (KIOSK), the market leader in custom self-service solutions, will showcase the industry's most resilient patient engagement platforms, powered discreetly by "zero-failure" computing technology from AOPEN, a global leader in commercial-grade Mini PCs.

Patient check-in is the critical first step in care delivery. When kiosks fail, waiting rooms flood and clinical workflows stall. This partnership addresses the two specific hardware challenges that plague hospital IT directors: infection control and unplanned downtime.

“

A kiosk in a hospital is a key medical asset. AOPEN is proud to be the intelligence inside the KIOSK solution, providing something clinicians value most: reliability. These units work—every time.”

*Chris Longo, AOPEN*

Designed and manufactured in the United States, KIOSK healthcare platforms are engineered to meet ADA requirements while supporting secure integration and enterprise-wide deployment.

Why Healthcare Leaders Should Visit the Booth:

-Infection Control Standard: Featured KIOSK solutions integrate AOPEN fanless thermal design, which is a requirement for sterile clinical environments, since it eliminates dust, bacteria, and airborne pathogens.

-Commercial-Grade Uptime: AOPEN engineers its industrial engines for 24/7 continuous

operation - no overheating, throttling, or failing under the heavy load of continuous patient use.

-The "Invisible" Upgrade: KIOSK provides the intuitive, ergonomic interface patients expect; AOPEN provides the hardened processing power hospitals require.

[Schedule a meeting at HIMSS with the KIOSK Team here](#), and be sure to include the AOPEN team to learn more about their Mini PCs that power the kiosks.

Engineered for the Clinic  
"A kiosk in a hospital is a key medical asset," said Chris Longo. AOPEN. "AOPEN is proud to be the intelligence inside the KIOSK solution, providing something clinicians value most: reliability. These units work. Every time."
