KPI Partners Elevates Partnership Tier and Expands Strategic Collaboration with Snowflake and Databricks

Enhances enterprise cloud data engineering capabilities and deepens collaboration across Snowflake and Databricks platforms.

OAKLAND, CA, UNITED STATES, February 19, 2026 /EINPresswire.com/ -- KPI Partners today announced that it has achieved Snowflake Premier Tier Partner status and advanced to Databricks Select Partner, marking a significant milestone in its continued investment in enterprise cloud data platforms and analytics modernization.

These tier advancements reinforce KPI Partners' position as a trusted global partner for cloud data engineering, data platform migration, and large-scale analytics transformation across North America, Europe, and the Asia-Pacific region.

Elevating Cloud Data Platform Expertise:

As enterprises accelerate cloud migration and modernize legacy data warehouses, they increasingly rely on certified partners with deep platform expertise and proven delivery models. Achieving Snowflake Premier Tier Partner status recognizes KPI's strong track record in implementing secure, scalable Snowflake solutions for enterprise clients.

The upgrade to Databricks Select Partner further validates KPI's experience in lakehouse architecture, data warehouse modernization, and large-scale data engineering initiatives. Together, these recognitions reflect KPI's ability to support complex enterprise environments with structpred governance, performance optimization, and scalable cloud data frameworks.

KPI Partners supports organizations in:

Migrating from legacy data warehouses to optimized Snowflake and Databricks cloud environments

Implementing governed lakehouse and cloud data architectures aligned with enterprise standards

Enhancing platform performance, scalability, and operational reliability

Modernizing data engineering pipelines to support unified analytics and reporting

Establishing AI-ready data foundations that extend the value of Snowflake and Databricks investments

Delivering Greater Enterprise Value:

> "These recognitions reflect our engineering discipline and platform expertise. Our focus remains on building secure, high-performance data environments that enable long-term enterprise growth."
> *Sid Goel, CTO & Partner – KPI Partners*

The strengthened collaboration enhances KPI's ability to deliver integrated data and operational solutions that reduce complexity and improve execution. Customers benefit from aligned platform expertise, structured implementation frameworks, and scalable architectures designed to support long-term growth.

By combining modern cloud data platforms with enterprise workflow capabilities, organizations can accelerate transformation initiatives while maintaining strong governance, security, and operational consistency.

Strengthening Strategic Ecosystem Alignment:

The expanded alignment reflects a shared commitment to delivering enterprise-grade solutions that connect data, analytics, and operational systems. By deepening collaboration across leading technology platforms, KPI strengthens its ability to support joint customer initiatives and drive measurable business outcomes.

This ecosystem approach reinforces KPI's position as a strategic partner capable of delivering end-to-end enterprise transformation.

Expanding Enterprise Capabilities with ServiceNow:

As modern data platforms evolve, organizations are also focused on improving operational efficiency across business systems. To help bridge data and operations, KPI Partners has entered into a strategic partnership with ServiceNow.

Through this collaboration, KPI extends its expertise into enterprise workflow automation and platform integration. By connecting cloud data environments with operational systems, KPI enables improved visibility, streamlined processes, and stronger cross-functional alignment.

This partnership enhances KPI's ability to deliver end-to-end enterprise transformation beyond core data modernization.
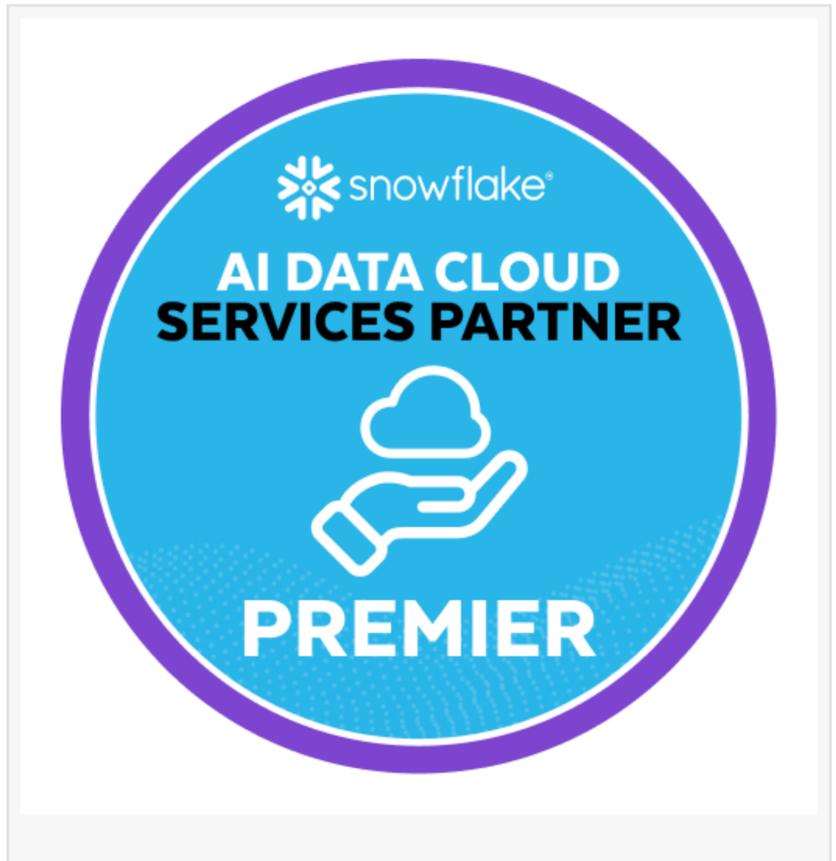

Strengthening a Broad Partner Ecosystem:

In addition to its Snowflake and Databricks tier advancements, KPI Partners maintains strategic partnerships with leading cloud providers including AWS, Google Cloud, Microsoft and other enterprise technology platforms. These alliances allow KPI to support multi-cloud environments and deliver integrated, scalable solutions tailored to client needs.

Together, these partnerships strengthen KPI's global delivery ecosystem and reinforce its commitment to enterprise-grade execution.

About KPI Partners:

KPI Partners is a trusted global strategic partner for Analytics and Digital Transformation solutions, backed by over 20 years of experience delivering innovation and sustainable growth across various industries. KPI's solutions span Data Science/GenAI/AI/ML, Cloud Databases, Data Engineering, Analytics & Visualization, and DevOps/DevSecOps/MLOps.

The company maintains Strategic partnerships with Microsoft, Databricks, AWS, Google Cloud, Snowflake, and ServiceNow, enabling enterprises to modernize and scale with confidence.
