

ITWS Financial Services Introduces ATLAS5 AI, Redefining Precision Tax Strategy An Finance

SAN DIEGO, CA, UNITED STATES,
February 20, 2026 /EINPresswire.com/

-- ITWS Financial Services today announced the launch of ATLAS5 AI, an advanced artificial intelligence platform designed to transform how individuals and businesses approach tax strategy, financial modeling, and long-term wealth preservation. Built to operate at the intersection of regulatory

intelligence and strategic foresight, ATLAS5 delivers enterprise-level tax optimization previously reserved for ultra-high-net-worth clients.

As tax laws grow increasingly fragmented and dynamic across jurisdictions and asset classes,

“

ATLAS5 is not a calculator—it's a strategic instrument”

*James Harnsberger, CEO of
ITWS*

ATLAS5 functions as an intelligent command system—analyzing legislation in real time and applying proprietary modeling to identify actionable savings opportunities. Early deployments of the platform have already uncovered tens of thousands of dollars in annual tax efficiencies for clients across multiple financial profiles

Unlike conventional tax software, ATLAS5 does not merely calculate outcomes—it anticipates them. The platform supports complex decision-making by simulating future scenarios and stress-testing strategies before capital is deployed. Integrated modules span real estate holdings, investment portfolios, digital assets, business structures, and personal tax planning.

Engineered for Accuracy and Scale

ATLAS5 was developed to remove the human error, fragmentation, and hindsight bias common in traditional tax planning workflows. Key capabilities include:

Advanced Crypto Tax Intelligence — Automatically reconciles high-volume blockchain activity while adapting to evolving domestic and international compliance standards.

Real Estate Tax Optimization — Dynamically models depreciation, cost segregation, and exchange strategies to improve cash flow and asset performance.

Business Structure Analysis — Identifies overlooked entity-level tax advantages for entrepreneurs, partnerships, and corporations.

Personal Wealth Strategy Mapping — Aligns tax decisions with long-term retirement, estate, and legacy objectives.

“ATLAS5 is not a calculator—it’s a strategic instrument,” said James Harnsberger, CEO of ITWS Financial Services. “We designed this platform to give clients clarity and control in an environment where uncertainty is costly. Within minutes, ATLAS5 can surface opportunities that typically take months to uncover. That level of precision changes how people plan, invest, and protect wealth.”

From Compliance to Command

One of ATLAS5’s defining features is its ability to model forward-looking outcomes. Users can run scenario analyses to evaluate how today’s decisions will perform under future tax regimes, market conditions, and regulatory shifts. This predictive architecture allows ITWS clients to move from reactive compliance to proactive financial command.

By removing complexity from areas such as crypto taxation and multi-asset planning, ITWS Financial Services continues to position itself as a leader in intelligent financial strategy—where technology and stewardship converge.
