

Chartered Institute Launches Certified Preventive Maintenance Leader (CPM™) Program for Global Industries

Chartered Institute of Professional Certifications Launches Certified

Preventive Maintenance Leader (CPM™) Program for Preventive Maintenance Leaders

SINGAPORE, SINGAPORE, SINGAPORE, March 23, 2026 /EINPresswire.com/ -- The [Chartered Institute of Professional Certifications](https://www.charteredcertifications.com)

“

With the CPM™ program, we aim to develop maintenance leaders who can think strategically, lead change, and build preventive maintenance systems that support long-term organizational resilience.”

Bok Yan Lo

(www.charteredcertifications.com), a globally recognized authority in certified executive programs and professional development, is pleased to announce the official launch of the Certified Preventive Maintenance Leader (CPM™) program. Developed in collaboration with seasoned maintenance leaders, reliability engineers, and industry practitioners, the CPM™ program is designed to equip professionals with the advanced leadership capabilities and technical expertise required to design, implement, and optimize world-class preventive maintenance strategies.

The CPM™ program is designed to meet the escalating demand for maintenance leaders capable of transforming organizations from reactive firefighting to disciplined, risk-based, and reliability-driven maintenance excellence. As asset-intensive industries confront mounting pressure to maximize uptime, reduce lifecycle costs, and comply with stringent safety and regulatory requirements, strong preventive maintenance leadership has become a decisive competitive advantage. Professionals who successfully complete the CPM™ program will be empowered to lead enterprise-wide maintenance transformations, drive reliability performance, and deliver measurable operational and financial results.

The CPM™ program will deliver a rigorous and comprehensive curriculum that will equip participants with the critical capabilities required to design and lead high-performing preventive maintenance systems. Key areas of focus include preventive maintenance strategy development, asset criticality and risk assessment, failure mode analysis and task optimization, planning and scheduling excellence, CMMS-enabled maintenance management, performance measurement, and continuous reliability improvement. Through the integration of proven frameworks with real-

world case studies, structured exercises, and scenario-based learning, participants will gain the ability to translate knowledge into immediate, measurable operational results.

“Preventive maintenance is no longer a technical function alone—it is a leadership discipline that directly influences safety, reliability, and business performance,” said Bok Yan Lo, Managing Director of the Chartered Institute of Professional Certifications. “With the CPM™ program, we aim to develop maintenance leaders who can think strategically, lead change, and build preventive maintenance systems that support long-term organizational resilience.”

The CPM™ program is delivered to the highest standards of professional excellence and is recognized internationally for its rigor and industry relevance. Participants may choose between flexible [on-demand](#), self-paced online learning and interactive, [live](#) instructor-led formats, enabling professionals to advance their credentials while accommodating diverse schedules and learning preferences.

Upon successful completion of the CPM™ program and passing the mandatory certification examination, participants will be awarded the Certified Preventive Maintenance Leader (CPM™) designation. This globally recognized credential is reserved exclusively for professionals who demonstrate proven competence, leadership capability, and applied expertise in preventive maintenance management.

For more information about the CPM™ program and to register, please visit the following websites:
