

# Jupiter Neurosciences Amends Yorkville Installment Provisions to Align Capital With Clinical and Commercial Execution

*Core Economic Terms of \$6.0 Million Financing Remain Unchanged*

JUPITER, FL, UNITED STATES, February 23, 2026 /EINPresswire.com/ -- [Jupiter Neurosciences, Inc.](https://www.jupiterneurosciences.com) (NASDAQ: JUNS), a clinical-stage pharmaceutical company focused on neuroinflammation and central nervous system disorders, today announced that it has entered into an Omnibus Amendment with YA II PN, Ltd., modifying the installment payment provisions of its previously disclosed Convertible Promissory Notes issued under the Company's Standby Equity Purchase Agreement.

“

That alignment enables us to remain focused on advancing our Phase II Parkinson's program while continuing to scale Nugevia™ and build commercial cash flow.”

*Christer Rosén, Chairman and CEO of Jupiter Neurosciences*

Jupiter Neurosciences is a [B2i Digital Featured Company](https://www.b2idigital.com/jupiter-neurosciences-1). View the company profile at <https://www.b2idigital.com/jupiter-neurosciences-1>.

Under the amendment:

- Monthly installment payments will now begin on April 1, 2026
- Principal repayments will follow a defined schedule agreed between the Company and Yorkville

The amendment does not introduce any new pricing provisions, reset features, or additional financing commitments. The amendment relates solely to installment timing and application mechanics and does not alter the underlying economic terms of the financing.

“This amendment reflects a deliberate and aligned decision between Jupiter and Yorkville,” said

Christer Rosén, Chairman and Chief Executive Officer of Jupiter Neurosciences. “Yorkville demonstrated its commitment to our long-term strategy by adjusting installment timing without changing pricing, maturity, or other economic terms. That alignment enables us to remain focused on advancing our Phase II Parkinson’s program while continuing to scale Nugevia™ and build commercial cash flow.”

Jupiter’s strategy combines clinical development with active commercial revenue generation. In addition to advancing its neuroinflammation pipeline, the Company is generating revenue through Nugevia™, its patented JOTROL™-based resveratrol platform. Current ecommerce sales reflect repeat purchase activity of approximately 25 percent and product return rates of approximately 3 percent. Management believes this early commercial validation, alongside continued clinical progress, strengthens Jupiter’s capital profile and differentiates the Company from biotechnology peers that rely solely on capital markets funding.

The Company remains in compliance with its obligations under the Transaction Documents.

About Jupiter Neurosciences, Inc.

Jupiter Neurosciences, Inc. is a clinical-stage pharmaceutical company focused on developing therapies for neuroinflammation and central nervous system disorders. The Company’s lead clinical program is advancing through a Phase IIa trial in Parkinson’s disease. Jupiter is also commercializing Nugevia™, a consumer product built on its patented JOTROL™ technology platform designed to enhance resveratrol bioavailability. Jupiter’s dual-path strategy combines clinical development with commercial revenue generation.
