

Green Edge Systems Launches NeonDynamic™ & Expands AmeriPlate® for Immediate Alignment with 2025-30 Nutrition Guidelines

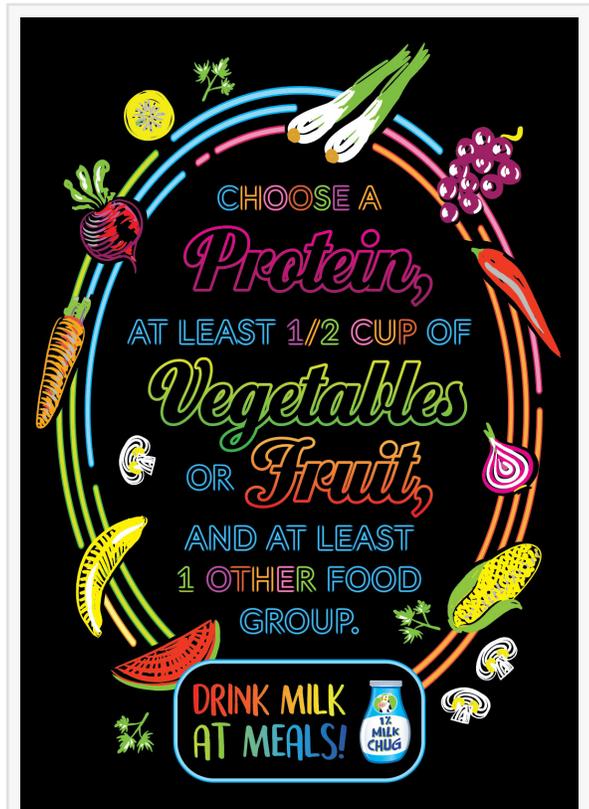

New visual communication solutions enable school food services to implement federal nutrition priorities immediately - before the multi-year menu reformulation.

WOODLAND HILLS, CA, UNITED STATES, February 24, 2026 /EINPresswire.com/ -- Green Edge Systems today announced the launch of [NeonDynamic™](#), a new animated neon signage line for school nutrition environments, alongside the expansion of [AmeriPlate®](#) graphics across its existing menu board portfolio. Together, these solutions are designed to help school food services align immediately with the Dietary Guidelines for Americans, 2025-2030 by translating national nutrition direction into clear, point-of-service student guidance.

School nutrition programs are entering a new phase where communication infrastructure plays a direct role in compliance, participation, and student selection behavior. While ingredient and procurement changes occur gradually, the priorities established by the new Dietary Guidelines - stronger emphasis on protein, fruits and vegetables, and balanced meal construction - are expected to be communicated now where students make daily choices.

As federal guidance increasingly focuses on selection behavior within Offer vs. Serve, visual guidance at the point of service is emerging as operational infrastructure rather than optional signage.

NeonDynamic™ introduces [Dynamic animated neon visual guidance](#) specifically designed for high-traffic cafeteria environments. Rotating prompts reinforce meal-building steps directly in

Choose Protein, Vegetables or Fruit - Portrait

student decision flow, supporting consistent selection behavior without adding staff workload or technology complexity.

At the same time, expanded AmeriPlate® graphics applied across LED Flashing, Dry Erase, and LED Backlit menu board formats allow districts to deploy consistent, guideline-aligned messaging across service lines using familiar, low-maintenance signage formats.

This combined approach enables districts to:

Prioritize protein, fruits, and vegetables in student decision flow

Reinforce reimbursable meal construction visually

Align cafeteria communication with federal nutrition priorities immediately

Support Offer vs. Serve behavior through structured prompts

Demonstrate visible implementation momentum during Administrative Review cycles

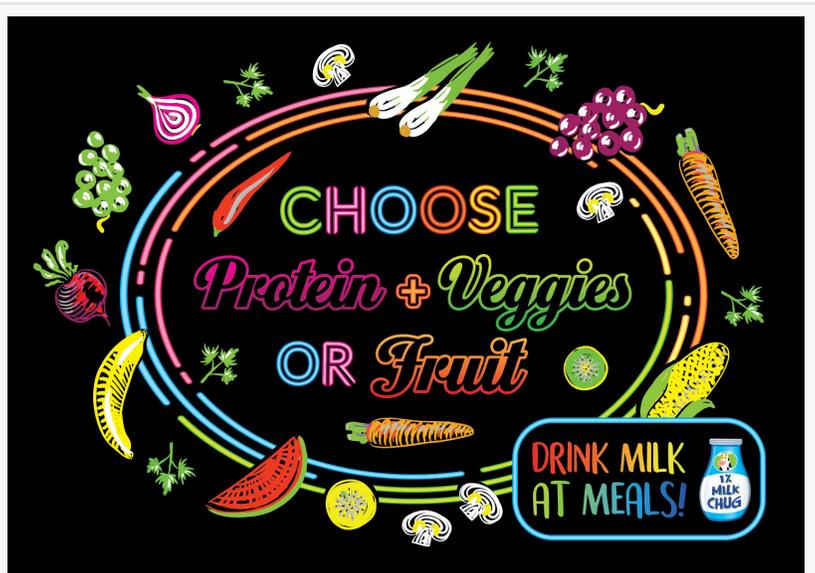

“

Nutrition policy changes expectations immediately. Signage is how schools translate those expectations into daily student behavior”

*Tommy Orpaz, President,
Green Edge Systems*

"Guidelines become real only when students see them where decisions happen," said Tommy Orpaz, Green Edge Systems. "Schools cannot wait for multi-year menu reformulation cycles. NeonDynamic™ and the expanded AmeriPlate® graphics give districts a practical way to act now."

Cafeteria signage is evolving from menu display toward structured meal-decision guidance. By combining dynamic animated messaging with standardized visual frameworks,

School Food Service Signage & Menu Board Effectiveness Comparison

Signage Option (Cafeteria)	Attention Capture	Readability (Fast)	Message Retention	Behavior Influence	Update Flexibility	Best Use in Cafeterias
Printed Signs	Low	Medium	Low	Low	Low	Compliance notices, basic reminders
Dry Erase Menu Boards	Medium	High	Medium	Moderate	Very High	Daily menu clarity, line-facing menus
Static Digital Displays	Low-Medium	Medium	Low-Medium	Low-Medium	High	Rotating menus, announcements
LED Flashing Text	High	High	Medium	Medium	Medium-High	Decision-point prompts, OVS steps
Static Neon Signs	High	High	High	Medium-High	Low	Branding, values, healthy eating themes
Dynamic Neon Signs	Very High	Very High	Very High	High	High	Meal-choice guidance, rotating cues

Bottom Line: Dynamic Animated Neon = Highest Impact for Cafeteria Menu Board & Signage Influence

Comparison Signage Effectivity Options

Green Edge Systems positions signage as a core implementation layer for modern school nutrition programs.
