Lumion continues to refine the architectural visualization workflow with Lumion Pro 2026.0

SASSENHEIM, ZUID HOLLAND, NETHERLANDS, February 24, 2026 /EINPresswire.com/ -- Lumion, the long-standing leader in professional visual communication solutions for architects, has announced the release of Lumion Pro 2026.0, the latest evolution of its flagship 3D rendering and visualization solution used by thousands of firms worldwide.

Urban masterplan rendered in Lumion Pro Urban masterplan aerial view rendered in Lumion Pro

For more than a decade, Lumion Pro has supported architects in transforming their concepts into compelling visual narratives. With the 2026.0 release, the company continues its proven commitment to architectural practice, by delivering targeted enhancements that streamline presentation workflows and strengthen design clarity.

> Architects choose Lumion Pro because it respects the way they work. Lumion Pro 2026.0 builds on that foundation. It helps architects move from almost finished to presentation-ready faster."
>
> *David Weir McCall, Head of Product at Lumion*

"Architects choose Lumion Pro because it respects the way they work," said David Weir McCall, Head of Product at Lumion. "Lumion Pro 2026.0 builds on that foundation. It helps architects move from almost finished to presentation-ready with fewer interruptions and with greater control over the end result."

Designed for the way Architects work/Built for real-world architectural projects

Some key enhancements in Lumion Pro 2026.0 include:

- Area Placement Tool: populate custom-shaped zones with up to 5,000 nature assets in a single action, accelerating large-scale context placement.
- 200+ New & Revamped Nature Assets – Including 73 exclusive ultra-high-resolution

photogrammetry trees: This exclusive collection of new fine detailed models adds an impressive new collection of trees and plants to Lumion's already extensive asset library.

- Fill-in Clipping Plane Tool: Generate clean, filled sectional views, drawings and diagrams and illustrate directly inside Lumion, eliminating the need for external post-processing.
- AI Image Upscaling (up to 16K): Produce large-format, print-ready outputs without extended render times or specialized hardware.
- 5 New Example Scenes & Templates: High-quality, visually stunning starting points designed to help new and existing users achieve professional results quickly.
