

# EasyDMARC Spotlights Email Security Deadline at Tech Show London

DOVER, DE, UNITED STATES, February 25, 2026 /EINPresswire.com/ -- With the UK National Cyber Security Centre (NCSC) set to retire its Mail Check service on March 31, 2026, EasyDMARC will highlight the urgency of deploying DMARC protection against domain spoofing and phishing at Cloud & Cyber Security Expo within Tech Show London from March 4th-5th 2026.

Email remains the most common entry point for cyberattacks, enabling fraud, ransomware incidents, and large-scale impersonation campaigns. Yet many organisations still operate without enforced DMARC policies, leaving their domains vulnerable to abuse by attackers.

EasyDMARC will demonstrate how organisations can move safely from monitoring to enforcement — a critical step in preventing unauthorised use of corporate domains without disrupting legitimate communications.

Courtney Austin, Vice President of Marketing at EasyDMARC, commented, “Email remains the primary entry point for cyberattacks, and EasyDMARC is uniquely positioned to help businesses defend against these threats with ease and efficiency. Email providers like Google, Microsoft, Yahoo and others are increasingly mandating DMARC so it has become essential not only for security but also for ensuring reliable email deliverability.

Attendees can meet EasyDMARC experts at Booth A260 for live demonstrations, implementation guidance, and one-to-one consultations tailored to enterprise, MSP, and public sector requirements.

The company will also participate in a conference session examining practical strategies for

The poster features the EasyDMARC logo in the top left. The main title is "Lessons from the Front Line: How Organisations Defend Against Phishing, Spoofing & Brand Impersonation". The event is part of the "CLOUD & CYBER SECURITY EXPO" held from 4-5 March 2026 at Excel London. The date and time are "5 March, 2026 10:40 AM - 11:05 AM" in Theatre 2. Two speakers are featured: Chris White, Director of the South East Cyber Resilience Centre, and Courtney Austin, VP Marketing at EasyDMARC. The background shows a shield on a cloud.

Lessons from the Front Line: How Organisations Defend Against Phishing, Spoofing & Brand Impersonation

defending against email-based attacks and strengthening domain trust.

Chris White, Director of the South East Cyber Resilience Centre, will join EasyDMARC on stage during the conference programme to share public-sector perspectives on phishing, impersonation, and domain security. “Many cyber incidents still begin with a deceptive email. Organisations that do not implement robust authentication controls leave themselves exposed to preventable attacks,” said Chris White. “Standards such as DMARC provide a practical and effective way to reduce the success of impersonation and phishing campaigns.”

#### Why This Story Matters Now

1. The NCSC has emphasised stronger email authentication across UK organisations.
2. Email impersonation remains a primary vector for cybercrime.
3. Spoofed domains are widely used in financial fraud and supply-chain attacks.
4. DMARC enforcement significantly reduces the success rate of such attacks.
