

ZagTrader Launches Integrated Securities Borrowing and Lending (SBL) Module for Financial Institutions

DUBAI, UNITED ARAB EMIRATES, March 9, 2026 /EINPresswire.com/ -- ZagTrader today announced the launch of its fully integrated Securities Borrowing & Lending (SBL) solution, enabling brokers and financial institutions to offer structured short-selling and securities lending services within a controlled, compliant, and automated framework.

The SBL module is designed to support institutional-grade operations, combining borrowing workflows, collateral management, interest accrual, and accounting integration within a unified ecosystem.

Expanding Institutional Capabilities

The SBL solution allows institutions to:

- Enable seamless securities borrowing for short-selling and settlement coverage
- Manage internal and external lender inventory within a fully segregated account structure
- Automatically calculate and accrue daily borrowing interest
- Enforce real-time collateral monitoring and risk controls
- Generate structured GL postings and month-end settlements
- Maintain full auditability and regulatory segregation

By integrating borrowing functionality directly into its trading and back-office infrastructure, ZagTrader provides a streamlined and scalable framework for institutions seeking to expand their service offering.

Institutional-Grade Risk and Control Framework

The SBL module incorporates:

- Dedicated borrowing account structures
- Cash collateral reservation with configurable haircuts and over-collateralization parameters
- Real-time coverage monitoring and margin-call logic
- Configurable exposure limits per user, ticker, and market
- Automated daily interest accrual with structured revenue mapping

All processes are system-driven, reducing operational risk and minimizing manual intervention.

Unlocking New Revenue Opportunities

The solution enables institutions to introduce structured securities lending as a scalable revenue stream through:

- Spread-based interest revenue
- Configurable platform margins
- Transparent lender allocation strategies (priority, pro-rata, weighted)
- Automated month-end interest settlement

Seamless Ecosystem Integration

ZagTrader's SBL module integrates directly within its existing trading, risk, accounting, and reporting ecosystem, ensuring:

- Real-time ledger reflection
- Controlled exposure management
- Continuous compliance monitoring
- Transparent borrower and lender dashboards

With the launch of the SBL module, ZagTrader continues to strengthen its position as a comprehensive institutional infrastructure provider, delivering multi-asset capabilities across trading, risk management, and post-trade operations.
