

# SSI Announces On Premise, Subscription Pricing for PowerPRO TMS

*Systems Support, Inc. (SSI) has introduced a subscription-based pricing for its PowerPRO TMS while still allowing customers to use their own in-house servers.*

PowerPRO TMS Software

WEST DES MOINES, IA, UNITED STATES,  
March 3, 2026 /EINPresswire.com/ --

Systems Support, Inc. (SSI) has introduced a new subscription-based pricing model for its [PowerPRO TMS](#), while continuing to offer trucking companies the option to use their own in-house servers. This approach lowers the upfront investment required while preserving the control and flexibility many carriers value.

According to SSI President Kirby Eddie, "We speak with companies every day that are being pushed by their current TMS providers to migrate to cloud-hosted platforms. Many of them are uncomfortable with that approach, especially those concerned about their data being shared or sold, or the risk of losing access to historical data if they choose to switch providers and discontinue service."

"Our new monthly, subscription pricing model allows companies to implement our PowerPRO TMS without the large, up-front cash expenditure of software licensing, but still allows them the security of maintaining their data on their own in-house servers."

Our monthly subscription fee is based on number of user licenses, modules, and includes cost of our exceptional customer support. Additionally, if your trucking business prefers not to maintain an on-premises server, Systems Support, Inc. can recommend trusted cloud providers to build and manage a dedicated server tailored to your needs. This approach can reduce or even eliminate the upfront investment in hardware for smaller trucking operations, while still giving you full ownership and control of your data within a fully managed environment. It also helps ease concerns for companies hesitant to use vendor-hosted cloud software due to data privacy issues or the potential for providers to use or sell their data to third parties.

About Systems Support, Inc.

Systems Support, Inc. (SSI) provides leading-edge software products to the transportation industry. Our team understands your business and your challenges and builds personal relationships that allow for open communication and positive results. SSI was launched in 1979 by providing custom programming work for several area trucking companies. From these relationships, our COLTS software was born and became the mainstay of SSI for over 20 years. Over the years, SSI has built a reputation for providing cutting-edge technology and high-quality service. Today, our PowerPRO software is the culmination of over 40 years of hands-on transportation software experience and is considered one of the best [trucking software](#) on the market.
