

# Ultimation Industries Adds Interroll HP5424 Power Supply to Conveyor Component Line

*New power supply option supports motor-driven roller conveyor systems in warehouses and distribution centers.*

ROSEVILLE, MI, UNITED STATES, March 4, 2026 /EINPresswire.com/ -- Ultimation Industries now stocks the [Interroll HP5424](#), a power supply built for facilities running motor-driven roller conveyors.

The HP5424 delivers the peak capacity these applications require while allowing decentralized mounting that simplifies installation."

*Alec Fitzgerald*

Conveyor systems with motorized rollers need a steady power source that can handle sudden demand spikes. When multiple conveyor zones start at the same time, the motors draw a surge of power. If the power supply cannot keep up, the system trips a breaker or experiences voltage drops that cause errors. The [HP5424 power supply](#) is engineered to handle these surges, delivering enough peak

output to start several motors simultaneously without interruption.

The unit mounts directly on or near the conveyor frame rather than inside a control cabinet across the facility. This shorter distance between the power supply and the motors it feeds reduces wiring costs and limits electrical interference that can disrupt conveyor controls.

Built-in safety features include overcurrent protection and a maintenance switch that locks in the off position. This allows technicians to service one section of the conveyor while other sections continue running. Status lights on the housing show whether the unit is operating normally or experiencing a fault.

The HP5424 works with Interroll's line of motorized rollers and conveyor controllers. Facilities using these systems in distribution, fulfillment, or manufacturing applications can now source the matching power supply through Ultimation.

"Distribution and fulfillment operations running Interroll roller systems need a power source that handles zone startups reliably," said Alec Fitzgerald, Digital Marketing Supervisor at Ultimation Industries. "The HP5424 delivers the peak capacity these applications require while allowing decentralized mounting that simplifies installation."

The Interroll HP5424 is available now. More information is available at [www.ultimationinc.com](http://www.ultimationinc.com).

## About Ultimation Industries

Ultimation Industries supplies conveyor systems and material handling components for manufacturers, distribution centers, warehouses, and indoor farming operations. The company serves commercial and individual customers with quick-ship and custom-configured products. For more information, visit [www.ultimationinc.com](http://www.ultimationinc.com).
