

MediDrive and Bambi Announce Powerful New API Integration via Clearview Software for Transportation Providers

AI scheduling, automated dispatch, GPS trip confirmation, and streamlined billing offer NEMT providers a faster, smarter way to manage MediDrive trips.

GREAT NECK, NY, UNITED STATES, March 6, 2026 /EINPresswire.com/ -- MediDrive, one of the nation's fastest-growing NEMT brokers, and Bambi, the AI-powered transportation platform built to modernize non-emergency medical transportation (NEMT), today announced a direct API integration that promises to transform how transportation providers manage their brokered trip workflows.

The integration connects MediDrive's expansive broker network directly into Bambi's [intelligent dispatch platform](#) via Clearview's API layer, enabling providers to seamlessly import MediDrive trips, optimize them through AI-powered dynamic scheduling and dispatch, and push completed trip confirmations back to MediDrive, all without leaving the Bambi dashboard.

A Smarter Way to Move Riders

For NEMT providers juggling dozens, or hundreds, of daily trips, managing broker relationships has traditionally meant toggling between platforms, manually entering trip data, and chasing down confirmations. This integration eliminates that friction entirely.

MediDrive trips flow directly into Bambi, where the platform's AI engine called "Run Bambi Run" in one click automatically optimizes scheduling and assigns drivers based on real-time availability, location, vehicle type, and patient needs. Once trips are completed, Bambi's GPS-verified, time-stamped trip confirmations, the gold standard for compliance documentation, are

pushed back to MediDrive for fast, accurate billing.

“This is what modern NEMT operations should look like,” said Nirav Chheda, CEO at Bambi. “Our providers have been asking for deeper broker integrations, and MediDrive was the perfect partner. Their commitment to technology-forward brokerage aligns with everything we’re building. Together, we’re removing the busywork so providers can focus on what matters, getting riders to their appointments safely and on time.”

Key Benefits of the Integration

One-Click Trip Import: All assigned MediDrive trips are instantly available inside Bambi, no manual data entry, no copy-pasting, no errors.

AI-Powered Dynamic Scheduling & Dispatch: Bambi’s intelligent routing engine automatically assigns imported trips to the right driver at the right time, maximizing efficiency and minimizing deadhead miles.

Integrating with Bambi gives our network members access to genuinely cutting-edge tools like AI scheduling, GPS verification, and automated confirmations that help them perform at the highest level.”

“Integrating with Bambi gives our network members access to genuinely cutting-edge tools like AI scheduling, real-time GPS verification, automated confirmations, that help them perform at the highest level. When our providers succeed, patients get better care. It’s that simple.”

The partnership underscores a shared philosophy: that the NEMT industry is long overdue for a technology upgrade. MediDrive has distinguished itself among brokers through its provider-first approach and modern digital infrastructure, while Bambi has earned a reputation as the most innovative NEMT software platform on the market, leveraging artificial intelligence

and an award winning user interface (UI) and user experience (UX) to quickly solve problems that legacy systems simply weren’t designed to handle. Bambi won the Innovation in NEMT Award for 2025 from NEMTAC (Non-Emergency Medical Transportation Accreditation Commission® (NEMTAC®)).

Integration Availability

The MediDrive integration is available now to all Bambi customers and existing MediDrive network members can activate the integration by contacting the Bambi team: contact@bambi.health. Providers interested in joining the MediDrive network or learning more about Bambi’s platform are encouraged to visit <https://www.bambinemt.com/> or <https://medidrive.com/>.

About Bambi Health

Bambi is the AI-powered transportation management platform purpose-built for non-emergency medical transportation (NEMT) providers. From intelligent scheduling and real-time dispatch to automated billing and GPS-verified trip documentation, Bambi gives operators the tools they need to run smarter, grow faster, and deliver exceptional patient experiences.
