

PeakPTT to Exhibit Advanced Push-to-Talk Over Cellular Radio Solutions at IWCE 2026 in Las Vegas

PeakPTT to present its nationwide LTE Push-to-Talk radio solutions for business and enterprise communications at IWCE Las Vegas, March 18-19.

VALENCIA, CA, UNITED STATES, March 3, 2026 /EINPresswire.com/ -- [PeakPTT](#), a leading provider of Push-to-Talk over Cellular (PoC) communication solutions for business and enterprise users, today announced that it will be exhibiting at the International Wireless Communications Expo (IWCE) 2026, taking place March 18-19, 2026, in Las Vegas, Nevada.

PeakPTT will be located at Booth #2150, where the company will showcase its full line of rugged, nationwide Push-to-Talk over Cellular radios designed to deliver instant communication over 4G LTE networks. The company's solutions provide businesses with reliable, carrier-certified communication devices that eliminate the range limitations of traditional two-way radios.

PeakPTT's product lineup includes advanced [LTE radios](#) engineered for industries such as transportation, construction, security, logistics, hospitality, education, and event management. These devices offer:

- Instant nationwide push-to-talk communication
- Crystal-clear audio with powerful speakers and noise cancellation
- GPS tracking and dispatch capabilities
- Rugged, IP-rated construction for demanding environments
- Secure, encrypted communication
- No FCC licensing required

Mobile Certified Push To Talk over Cellular Radio with WiFi - PTT-M14G

Our mission is to provide businesses with dependable, professional-grade communication tools that work anywhere cellular coverage & WiFi exists.”

George Karonis

Simple, scalable deployment for growing teams

“Our mission is to provide businesses with dependable, professional-grade communication tools that work anywhere cellular coverage exists,” said George Karonis, CEO of PeakPTT. “IWCE brings together leaders in critical communications, and we’re excited to demonstrate how PeakPTT delivers nationwide coverage, rugged reliability, and simplicity without the complexity of traditional radio infrastructure.”

Unlike conventional land mobile radio systems that require repeaters, tower infrastructure, and ongoing maintenance, PeakPTT radios operate over established LTE networks, significantly reducing capital expenditures while expanding coverage nationwide.

Attendees of IWCE 2026 are invited to visit Booth #2150 to experience live demonstrations of the company’s Push-to-Talk radios, explore integration capabilities, and learn about dealer and enterprise partnership opportunities.
