

ECI Elastic Achieves GRS Certification Across All Global Manufacturing Facilities

Taiwan-based narrow fabrics manufacturer completes sustainability milestone with full GRS certification in Taiwan, China, and Vietnam

CHUNGHUA, CHUNGHUA COUNTY, TAIWAN, March 4, 2026

/EINPresswire.com/ -- [ECI Elastic Co., Ltd.](#), a leading global [manufacturer of elastic tapes and narrow fabrics](#),

announced today that all its manufacturing facilities in Taiwan,

China, and Vietnam have achieved Global Recycled Standard (GRS) certification. This milestone positions ECI as one of the few vertically integrated elastic tape manufacturers worldwide to hold comprehensive GRS certification across its entire production network.

“

This certification represents more than a compliance achievement, it reflects our dedication to creating sustainable value throughout our entire operation”

Paul Shen, Senior Sales Manager

The GRS certification validates ECI's commitment to sustainable manufacturing practices, covering recycled content verification, environmental principles, and social responsibility throughout the supply chain. With this achievement, ECI can now offer customers fully traceable, certified recycled elastic solutions from any of its production locations.

"This certification represents more than a compliance achievement, it reflects our dedication to creating sustainable value throughout our entire operation," said

Paul Shen, Senior Sales Manager. "Since our founding in 1974, we've pursued flexibility and created with full sincerity. Today, that philosophy extends to our environmental responsibility and our customers' sustainability goals."

Expanding Sustainable Solutions for Global Brands

ECI's GRS-certified facilities can now produce recycled elastic tapes, binding tapes, waistbands, drawcords, and decorative trims that meet the stringent requirements of major athletics,

ECI Achieves GRS Certification Across Its Facilities

apparel, and lingerie brands. The certification covers the complete production process, from raw material selection through weaving, dyeing, finishing, and packaging.

The company's vertical manufacturing model provides unique advantages in delivering GRS-certified products. By controlling every production stage in-house, ECI ensures complete traceability and quality consistency across all recycled material applications.

This achievement builds on ECI's existing environmental certifications, including Oeko-Tex Standard 100, Higg FEM, and participation in the BVE3 Chemical Management Platform recognized by ZDHC. The company continues investing in clean energy sources and innovative waste recycling programs across all facilities.

A Legacy of Innovation

For over five decades, ECI has evolved from a local Taiwanese manufacturer into a trusted global partner for leading brands in athletic wear, apparel, and intimate wear. The company's innovations include contributions to the lightweight professional soccer jerseys worn by world champions in 2014 and exclusive development of specialized protective webbing for Adidas sports masks during the 2020 pandemic.

With a current combined production capacity exceeding 50 million meters per month, ECI maintains its commitment to quality while advancing environmental stewardship. The GRS certification enables the company to support customers' sustainability initiatives with verified recycled content solutions.

About ECI Elastic Co., Ltd.

ECI GRS Certified Product

ECI-Certifications: GRS, OEKO, ISO, Higg Index
