

Impact Lighting Completes Fiber Optic Star Ceiling At Selva San Jose An Immersive Luxury Tequila Bar

SAN JOSE, CA, UNITED STATES, March 4, 2026 /EINPresswire.com/ -- [Impact Lighting Inc](#), a national leader in custom architectural and LED lighting design, has completed a spectacular fiber optic star ceiling installation at [Selva](#), San Jose's most talked about luxury tequila bar and lounge. Impact Lighting has installed a custom star ceiling, adding a celestial layer to Selva's renowned "Immersive Jungle Escape."

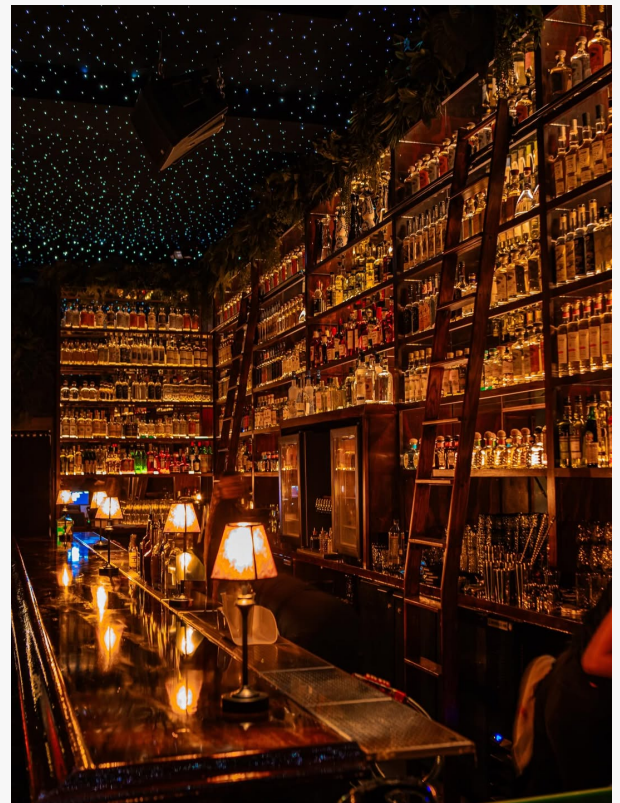

Located at 44 S Almaden Ave in downtown San Jose, Selva has quickly become a destination for those seeking a sophisticated retreat. The venue is designed to transition seamlessly from a tranquil, hospitality-focused cocktail lounge in the early evening to a high-energy nightlife destination featuring top-tier DJs and live entertainment.

The addition of the [EpiXsky Star Ceiling System](#) by Impact Lighting plays a critical role in this atmosphere shift. By night, the ceiling transforms the indoor space into an open-air tropical canopy, providing the illusion of sitting under a clear midnight sky deep within a rainforest.

The installation features high-density fiber optic points that mimic natural constellations, utilizing flicker technology to create a realistic "twinkle" that interacts with Selva's lush greenery and luxury finishes. This project follows the success of Impact Lighting's recent installation at Leila in San Diego, further cementing the company's status as a leader in experiential hospitality lighting.
