

TRUEiGTECH Horse Racing Platform Achieves Global Compliance Gold Standard

TRUEiGTECH sets a new industry benchmark by securing full compliance with UKGC, MGA, and Brazil standards for its premier horse racing and betting platform.

LAS VEGAS, NV, UNITED STATES, March 4, 2026 /EINPresswire.com/ -- Quick Overview:

Full Global Compliance: TRUEiGTECH's horse racing platform now meets stringent UKGC, MGA, and Brazil (Bill 3,626/2023) standards.

Regulatory Agility: The software features automated monitoring and modular adapters to bypass legal bottlenecks during market scaling.

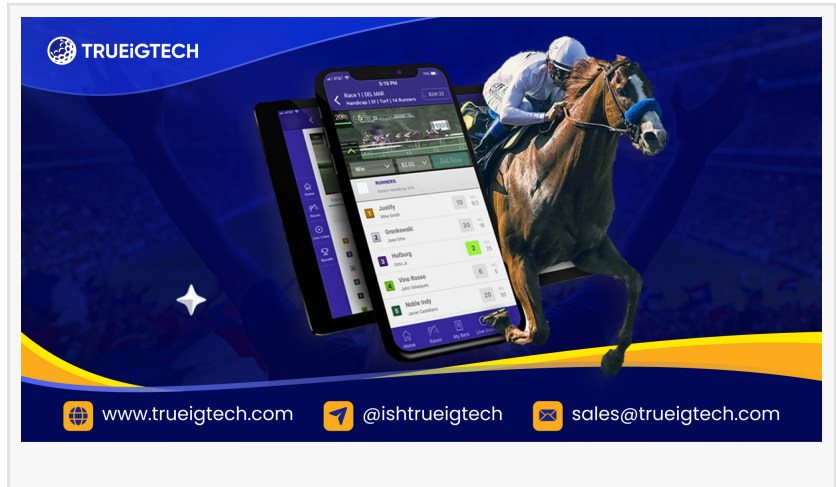

Technical Integrity: Operators can get sub-millisecond data latency and ISO-standard encryption for secure, audited wagering.

Operational Efficiency: Boosts performance by 40% through centralized compliance automation.

The global sports betting landscape is undergoing a paradigm shift in regulatory oversight, driven by the implementation of the UK's Gambling Act Review White Paper, the maturation of Brazil's Bill 3,626/2023, and tightening MGA (Malta Gaming Authority) player protection mandates.

In the light of this, TRUEiGTECH, a premier leader in iGaming software development, today announced that its proprietary [horse racing software solutions](#) have achieved a milestone of full compliance across major international licensing frameworks.

This achievement solidifies TRUEiGTECH's position as a preferred partner for operators seeking to navigate the complexities of multi-jurisdictional tax laws, anti-money laundering (AML)

protocols, and the varying technical standards of emerging Latin American and Asian markets.

In an era where regulatory agility is the difference between market dominance and debilitating legal friction, TRUEiGTECH has engineered a solution that transcends basic functionality. By integrating automated compliance monitoring, real-time tax calculation engines, and modular jurisdictional adapters, the platform ensures that operators can scale rapidly across borders without the traditional bottleneck of localized legal re-certification or the risk of non-compliance penalties.

Engineering Trust | The Core of Regulatory Excellence

Today, when the regulations of the iGaming market are changing everyday, the need for a unique blend of heritage and high-tech precision in the horse racing software has become necessary.

TRUEiGTECH's horse racing platform is built on a "Compliance-by-Design" architecture. Therefore, rather than treating legal requirements as an afterthought, the software incorporates real-time KYC (Know Your Customer) and AML (Anti-Money Laundering) protocols directly into the wagering engine.

This proactive approach allows operators to maintain the highest integrity standards, protecting both the brand and the end-user while adhering to the strictest global mandates.

Boosting Operational Efficiency by 40% For Operators

Operating a global sportsbook requires more than just a sleek interface. It demands a backbone capable of navigating a fragmented legal landscape. TRUEiGTECH's [white label horse racing software](#) is engineered to transform regulatory hurdles into competitive advantages.

Dynamic Adaptation to Evolving Global Frameworks

From the stringent requirements of the UK's Gambling Act to burgeoning regulatory shifts in Brazil and Spain, the global environment has become dynamic. TRUEiGTECH's platform features a centralized regulatory management hub.

This system allows for instantaneous updates to betting limits, tax calculations, and responsible gambling triggers based on the user's specific geographic location.

Advanced Technical Integrity and Data Security

Licensing isn't just about rules. It's about the robustness of data. Our horse racing platform utilizes high-frequency data feeds with sub-millisecond latency, ensuring that price fluctuations and race results are audited and transparent. Our commitment to ISO-standard data encryption and secure API integration ensures that player data remains invulnerable.

Empowering Operators with Future-Proof Technology

While many legacy systems struggle to keep pace with digital-first regulations, TRUEiGTECH provides a future-proof ecosystem. The platform supports a wide array of formats from

Thoroughbred and Harness racing to virtuals, all while maintaining a unified compliance layer. This versatility ensures that as new markets open or existing ones tighten their rules, TRUEiGTECH partners are already equipped with the necessary tools to pivot and thrive.

A Vision for a Transparent Wagering Future

"Achieving this level of global compliance is not just a technical milestone; it is a promise to our partners," says the TRUEiGTECH Market Leadership Team. "We are setting the gold standard for what a horse racing platform should be: fast, engaging, and unyieldingly compliant. We believe that a transparent, well-regulated environment is the only way to ensure the long-term sustainability of the iGaming industry."

About TRUEiGTECH

TRUEiGTECH is a global pioneer in iGaming software development, specializing in high-performance sportsbook solutions, prediction markets, and betting exchange technology. Known for their GEO-optimized content and cutting-edge API integrations, TRUEiGTECH empowers operators to launch and scale world-class betting experiences with ease.
